 - Saw Mill River (Riverine Flooding)
 - Bronx River and tributaries (Riverine Flooding)
 - Grassy Sprain Brook and tributaries (Riverine Flooding)
 - Grassy Sprain Reservoir
 - Tibbetts Brook (Riverine Flooding)

Community Vision

Draft Vision

Our Vision for the City of Yonkers is to protect its vibrancy and diversity from future storm damage by implementing cohesive projects, policies and programs that will ensure that the City remains economically and environmentally resilient and resistant to floods and storm damage.

Draft Goals

- **Protect and Preserve** the character of our neighborhoods from future storms.
- **Address** flooding as a Citywide problem – with multiple watersheds as contributors – that requires a coordinated mitigation effort with solutions unique to each watershed.
- **Collaborate** with City, County, State and Federal agencies regarding drainage improvements and maintenance.
- **Advance** educational outreach to ensure our residents understand natural hazards and how they can protect themselves, their homes, neighborhoods, and communities against future storms.
- **Develop** policy, design, and construction standards to make our community more resilient in the future.
- Others?

Review of Critical Issues

Critical Issues

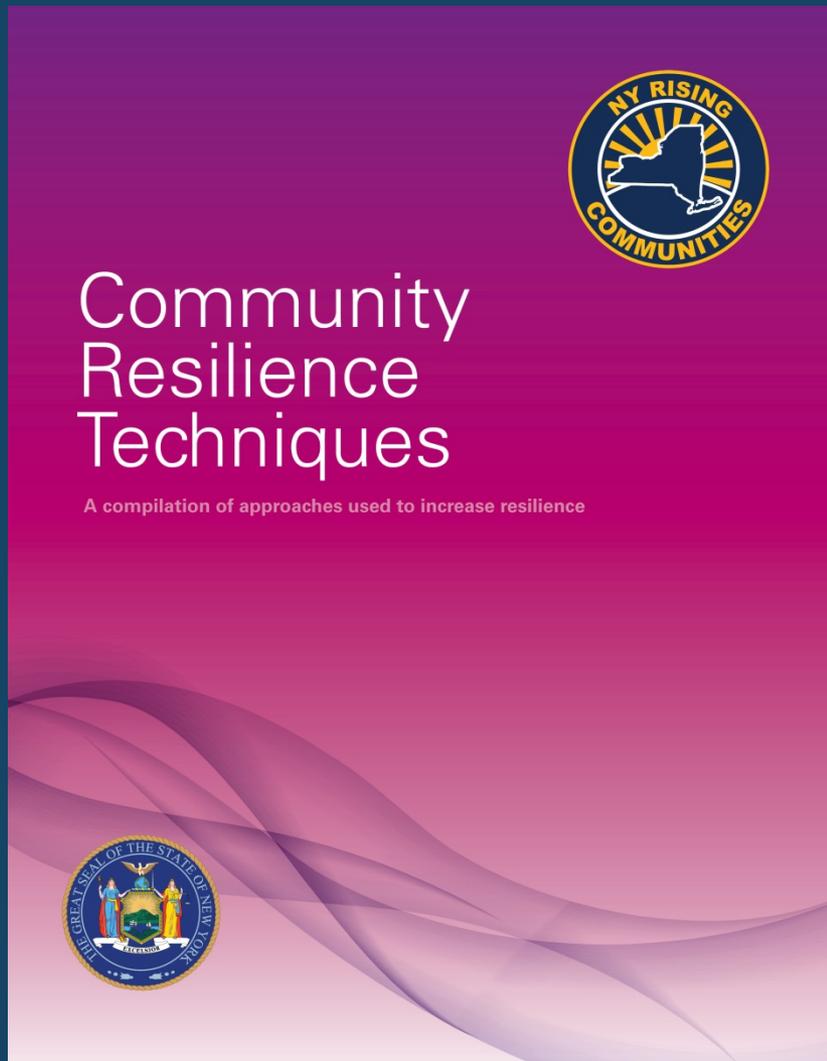

- Flooding – riverine and coastal
- Stormwater
- Tree damage
- Infrastructure susceptible to storm damage
- Education – safe practices during storms
- Communications – Federal, State, County, City
- Retaining environmental integrity of waterways and other ecosystems
- Managing negative impacts of development
- Others?

Precedents from NYRCR Round 1 Communities

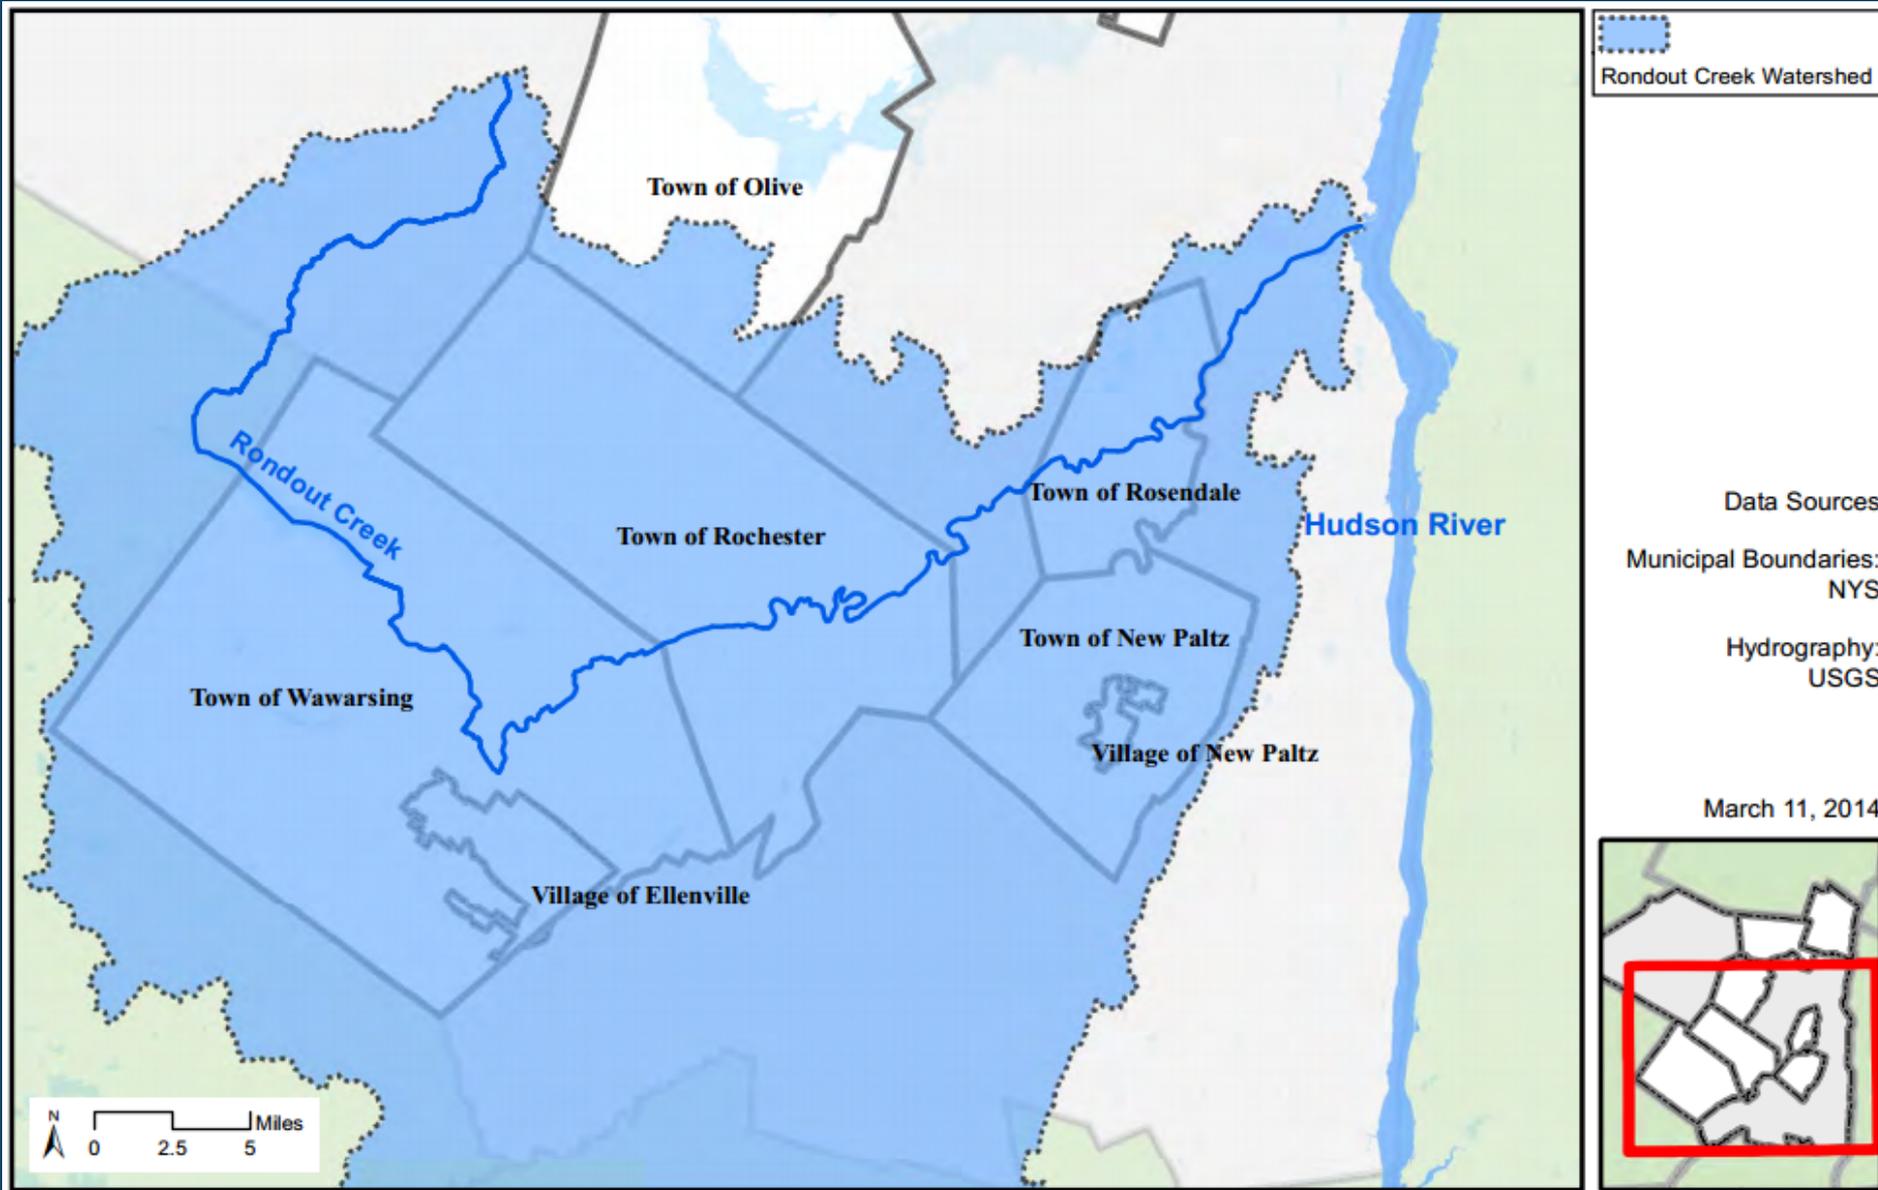

Resiliency Techniques

- Conserve, Enhance, and Restore Natural Protective Features
- Resilient Construction
- Structural Defenses
- Land Use Planning and Regulation
- Market-Based Methods
- Awareness, Information, and Preparedness
- Systemic Resilience

Ulster County – Watershed Studies

Stony Point – Comprehensive Neighborhood Approach

- Hudson River waterfront heavily affected by Superstorm Sandy and Hurricane Irene
 - Need for both quick recovery and long-term vision
- Devised a comprehensive strategy
 - Short-term
 - Shoreline protection – mix of hard and soft infrastructure
 - Drainage and sewer system repairs/enhancements
 - Revise LWRP
 - Demolish abandoned structures
 - Medium-term
 - Improve access to waterfront
 - Rebuild King’s Ferry Landing
 - New public dock/pier
 - Long-term
 - Waterfront development strategy
 - Ba Mar

Asset Inventory and Asset Mapping

Recovery Support Functions

Natural/Cultural
Resources

Infrastructure

Health/Social
Services

Community Planning,
Capacity Building

Economic
Development

Housing

Natural and Cultural Resources

- Hudson River
- Saw Mill River
- Grassy Sprain Brook & Bronx River/Reservation
