

NY Rising Housing Recovery Program Asbestos Remediation Acknowledgement

October 28, 2015

This form must be filled out by the applicant and Qualified Environmental Professional (QEP) prior to any Program funds being released for environmental remediation. See the document **Environmental Remediation Guidance** for additional information.

Please note that the program will only pay for asbestos remediation of work captured in an AA or ECR. Acceptance of an Acknowledgement form by the program does not approve the quantities to be paid for by the program. For example:

Program Allowable Scope of Work for Remediation of Exterior Asbestos Shingles:

Scope of work for remediation of damaged shingles: The Program allowance for the square footage for remediation of damaged exterior asbestos shingles is commensurate with the number of damaged shingles in square feet, not all shingles.

Scope of work for remediation of shingles related to elevation of home: The Program allowance for asbestos shingles remediation for home elevation is commensurate with the program allowance for siding removal to facilitate the installation of wall strapping. (3' around the perimeter for elevation of the home.)

Asbestos Type	Location	Quantity

Upon completion of all asbestos work for which reimbursement is being requested, the applicant shall submit the documentation listed below (contained within a single report submittal) to the program for review. These documents should be compiled in cooperation with your asbestos contractor.

Signature of Applicant	Date
Signature of Asbestos Contractor	Date

Asbestos Remediation

Applicants shall provide documentation from a Qualified Environmental Professional (QEP) demonstrating compliance with the associated federal, state, and local asbestos regulations as required by the NY Rising program. The information to be provided includes:

1. The name and license number of the firm who conducted the abatement work (include copy of New York State license);
2. The name(s) and certificate number(s) of the individual project Supervisor(s) and Asbestos Handler(s) who conducted the abatement work (include copy of New York State certificate);
3. Copies of Project Notifications to New York State Department of Labor and United States Environmental Protection Agency, if applicable.
4. The name and license number of the firm who conducted the independent air testing and contractor monitoring (include copy of New York State license), if applicable;
5. The name(s) and certificate number(s) of the individual Project Monitor(s) and/or Air Sampling Technician(s) who conducted the independent air testing and contractor monitoring (include copy of New York State certificate), if applicable;

6. The name of the laboratory that analyzed air samples and its New York State Department of Health Environmental Laboratory Approval Program (ELAP) number, if applicable;
7. Copies of the waste manifest(s) that verifies waste generated by the remediation work was properly transported and disposed of at a landfilled permitted to receive asbestos waste;
8. Copies of waste transporter's licenses;
9. Statement or report from the independent air/project monitoring firm indicating that the contractor's work was performed in accordance with all applicable rules/regulations and acceptable clearance air sampling results were obtained, as applicable. If an independent air/project monitoring firm was not required in connection with the project, this statement shall be provided by the asbestos abatement contractor; and
10. Copy of paid invoice from licensed contractor.
