Instructions for Completing Part 1

**Part 1 is to be completed by the applicant or project sponsor.** Responses become part of the application for approval or funding, are subject to public review, and may be subject to further verification.

Complete Part 1 based on information currently available. If additional research or investigation would be needed to fully respond to any item, please answer as thoroughly as possible based on current information; indicate whether missing information does not exist, or is not reasonably available to the sponsor; and, when possible, generally describe work or studies which would be necessary to update or fully develop that information.

Applicants/sponsors must complete all items in Sections A & B. In Sections C, D & E, most items contain an initial question that must be answered either “Yes” or “No”. If the answer to the initial question is “Yes”, complete the sub-questions that follow. If the answer to the initial question is “No”, proceed to the next question. Section F allows the project sponsor to identify and attach any additional information. Section G requires the name and signature of the project sponsor to verify that the information contained in Part 1 is accurate and complete.

### A. Project and Sponsor Information.

<table>
<thead>
<tr>
<th>Name of Action or Project:</th>
<th>Carls River and Connetquot River Watersheds and Southwest Sewer District #3 Sewer Project</th>
</tr>
</thead>
<tbody>
<tr>
<td>Project Location (describe, and attach a general location map):</td>
<td>Town and Village of Babylon; Town of Islip, (See Figure 1), Suffolk County, New York</td>
</tr>
<tr>
<td>Brief Description of Proposed Action (include purpose or need):</td>
<td>The project would: (1) install service laterals connecting residential parcels in Southwest Sewer District #3 (SSD3) to existing collection and conveyance systems terminating at Suffolk County’s Bergen Point Wastewater Treatment Plant; (2) construct a new collection system to connect residential and commercial parcels to existing conveyance and treatment systems in the Carls River and Connetquot River watersheds (subsequently referred to as the Carls River and Connetquot River expansion areas, respectively). The SSD3 boundary would then be expanded to include the Carls River and the Connetquot River expansion areas. The Proposed Action potentially involves federal, state and local approvals, and is subject to NEPA and SEQRA and their implementing regulations. The proposed project seeks to mitigate impacts associated with on-site wastewater treatment and disposal systems (OSWS) failures caused by natural hazards. Nearly 74 percent of residential and commercial properties in Suffolk County rely on OSWS (septic tanks and cesspools) to handle the treatment and disposal of wastewater, and OSWS failures in the project area cause public health risks associated with uncontrolled sewage discharges during and after storm events. The project is needed because OSWS in the project area are susceptible to both capacity and treatment or disposal failures during floods and heavy rain events. The project would address nitrogen and pathogen pollution by reducing the total net nitrogen load into surface and ground water from existing on-site sanitary disposal systems.</td>

## C. Planning and Zoning

### C. Planning and zoning actions.

Will administrative or legislative adoption, or amendment of a plan, local law, ordinance, rule or regulation be the only approval(s) which must be granted to enable the proposed action to proceed?

- If Yes, complete sections C, F and G.
- If No, proceed to question C.2 and complete all remaining sections and questions in Part 1

### C.2. Adopted land use plans.

a. Do any municipally-adopted (city, town, village or county) comprehensive land use plan(s) include the site where the proposed action would be located? ☒ Yes ☐ No

If Yes, does the comprehensive plan include specific recommendations for the site where the proposed action would be located? ☐ Yes ☒ No

b. Is the site of the proposed action within any local or regional special planning district (for example: Greenway Brownfield Opportunity Area (BOA); designated State or Federal heritage area; watershed management plan; or other?) ☒ Yes ☐ No

If Yes, identify the plan(s):

c. Is the proposed action located wholly or partially within an area listed in an adopted municipal open space plan, ☐ Yes ☒ No or an adopted municipal farmland protection plan? If Yes, identify the plan(s):  

---

Page 2 of 13
C.3. Zoning

a. Is the site of the proposed action located in a municipality with an adopted zoning law or ordinance. ☑ Yes ☐ No

b. Is the use permitted or allowed by a special or conditional use permit? ☑ Yes ☐ No

c. Is a zoning change requested as part of the proposed action?

   i. What is the proposed new zoning for the site? ___________________________________________________________________

C.4. Existing community services.

a. In what school district is the project site located? ________________________________________________________________

b. What police or other public protection forces serve the project site?

   Police services are provided by the various municipalities located within the Towns of Babylon and Islip as well as the Suffolk County Police Department.

c. Which fire protection and emergency medical services serve the project site?

   Fire and emergency medical services are provided by the various municipalities located within the Towns of Babylon and Islip.

d. What parks serve the project site?

   Parks located in the project area include: Ronkonkoma Park, Michel Park, Peterkin Park, Pease Park, James Caples Memorial Park, Amityville Bathing Park, Straight Path Park, Firemans Memorial Park, Brookwood Hall Park, Shore Road Park, Neguntatogue Park, Sherbrook Park, Babylon Town Hall Park, Balfour Point County Park, Southards Pond Park, Hawley's Lake Park, West Islip, Town Beach and Marina Park, and Sardiners County Park.

D. Project Details

D.1. Proposed and Potential Development

a. What is the general nature of the proposed action (e.g., residential, industrial, commercial, recreational; if mixed, include all components)? ___________________________________________________________________

b. Total acreage of the site of the proposed action? __________ acres

   Total acreage to be physically disturbed? __________ acres

   Total LF (project site and any contiguous properties) owned or controlled by the applicant or project sponsor? Approx. 4.752M LF

b. Is the proposed action an expansion of an existing project or use? ☐ Yes ☑ No

   i. If Yes, what is the approximate percentage of the proposed expansion and identify the units (e.g., acres, miles, housing units, square feet)? ________________

   Units: __________________

   Wastewater: 8% - adding 1.67 MGD to existing 27.7 MGD average daily load.  
   Sewer lines: 5.5% - adding approximately 246,900 LF.

d. Is the proposed action a subdivision, or does it include a subdivision? ☐ Yes ☑ No

   i. Is the cluster/conservation layout proposed? (e.g., residential, industrial, commercial; if mixed, specify types) ☐ Yes ☑ No

   ii. Number of lots proposed? ________

   iii. Minimum and maximum proposed lot sizes? Minimum ________ Maximum ________

e. Will proposed action be constructed in multiple phases? ☐ Yes ☑ No

   i. If No, anticipated period of construction: __________________

   ii. If Yes:

      • Total number of phases anticipated __________________

      • Anticipated commencement date of phase 1 (including demolition) _____ month _____ year

      • Anticipated completion date of final phase _____ month _____ year

      • Generally describe connections or relationships among phases, including any contingencies where progress of one phase may determine timing or duration of future phases: _______________________________________________________________

______________________________________________________________

   a. Acreage is based on linear feet of sewer main to be installed. Unconnected parcels are still being verified within the Carls River Expansion Area and the SSD3; the total acreage and LF will be included in the analysis in the EA.

   b. Total project area is represented in linear feet (LF). All roadways, where sewer mains are to be constructed, are publicly owned or controlled, but on-site grinder pumps, backflow preventers/check valves, and service laterals may occur on privately-owned property.
f. Does the project include new residential uses?  □ Yes ☑ No

If Yes, show numbers of units proposed.

<table>
<thead>
<tr>
<th>Initial Phase</th>
<th>One Family</th>
<th>Two Family</th>
<th>Three Family</th>
<th>Multiple Family (four or more)</th>
</tr>
</thead>
<tbody>
<tr>
<td>At completion of all phases</td>
<td>_______</td>
<td>_______</td>
<td>_______</td>
<td>_______</td>
</tr>
</tbody>
</table>

Not including general site preparation, grading or installation of utilities or foundations where all excavated materials will remain onsite.

h. Does the proposed action include construction or other activities that will result in the impoundment of any liquids, such as creation of a water supply, reservoir, pond, lake, waste lagoon or other storage?  □ Yes ☑ No

If Yes,

i. Purpose of the impoundment: _______________________________________________________________

ii. If a water impoundment, the principal source of the water: ☐ Ground water ☐ Surface water streams ☐ Other specify: _______________________________________________________________

iii. If other than water, identify the type of impounded/contained liquids and their source.

iv. Approximate size of the proposed impoundment. Volume: _______ million gallons; surface area: _______ acres

v. Dimensions of the proposed dam or impounding structure: _______ height; _______ length

vi. Construction method/materials for the proposed dam or impounding structure (e.g., earth fill, rock, wood, concrete):

D.2. Project Operations

a. Does the proposed action include any excavation, mining, or dredging, during construction, operations, or both?  ☐ Yes ☑ No

(Not including general site preparation, grading or installation of utilities or foundations where all excavated materials will remain onsite)

If Yes:

i. What is the purpose of the excavation or dredging? _______________________________________________________________

ii. How much material (including rock, earth, sediments, etc.) is proposed to be removed from the site?

- Volume (specify tons or cubic yards): 228,291 cy
- Over what duration of time? 1.5 - 3 years

iii. Describe nature and characteristics of materials to be excavated or dredged, and plans to use, manage or dispose of them.

iv. Will there be onsite dewatering or processing of excavated materials?  ☐ Yes ☑ No

If yes, describe: Dewatering will be required in some locations within the study area, such as areas with groundwater at a depth of less than 10 feet.

v. What is the total area to be dredged or excavated? +/- 18.5 acres

vi. What is the maximum area to be worked at any one time? +/- 500 linear feet acres

vii. What would be the maximum depth of excavation or dredging? approximately 25 feet

viii. Will the excavation require blasting?  ☐ Yes ☑ No

ix. Summarize site reclamation goals and plan:

Suitable soils will be placed back into utility trenches and compacted per utility requirements. Remaining excavated material (estimated to comprise 10% of all excavated material) would be hauled away by an approved excavation contractor to a licensed disposal facility.

b. Would the proposed action cause or result in alteration of, increase or decrease in size of, or encroachment into any existing wetland, waterbody, shoreline, beach or adjacent area?  ☐ Yes ☑ No

If Yes:

i. Identify the wetland or waterbody which would be affected (by name, water index number, wetland map number or geographic description): Estuarine Marine and Deepwater, Freshwater Emergent, Freshwater Forested/Shrub, Freshwater Pond, Riverine
ii. Describe how the proposed action would affect that waterbody or wetland, e.g. excavation, fill, placement of structures, or alteration of channels, banks and shorelines. Indicate extent of activities, alterations and additions in square feet or acres:

The construction of sewer infrastructure, including service laterals and backflow preventers, may potentially result in the alteration of, increase or decrease in size of, or encroachment into approximately 30.4 acres of existing wetlands or adjacent areas.

iii. Will proposed action cause or result in disturbance to bottom sediments? Yes ☐ No ☑
If Yes, describe:

iv. Will proposed action cause or result in the destruction or removal of aquatic vegetation? Yes ☐ No ☑
If Yes:

- acres of aquatic vegetation proposed to be removed:
- expected acreage of aquatic vegetation remaining after project completion:
- purpose of proposed removal (e.g. beach clearing, invasive species control, boat access):

- proposed method of plant removal:
- if chemical/herbicide treatment will be used, specify product(s):

v. Describe any proposed reclamation/mitigation following disturbance:

vi. Will the proposed action use, or create a new demand for water? Yes ☐ No ☑
If Yes:

i. Total anticipated water usage/demand per day: gallons/day

ii. Will the proposed action obtain water from an existing public water supply? Yes ☐ No ☑
If Yes:

- Name of district or service area:
- Does the existing public water supply have capacity to serve the proposal? Yes ☐ No ☑
- Is the project site in the existing district? Yes ☐ No ☑
- Is expansion of the district needed? Yes ☐ No ☑
- Do existing lines serve the project site? Yes ☐ No ☑

iii. Will line extension within an existing district be necessary to supply the project? Yes ☐ No ☑
If Yes:

- Name of district or service area:
- Source(s) of supply for the district:

iv. Is a new water supply district or service area proposed to be formed to serve the project site? Yes ☐ No ☑
If, Yes:

- Applicant/sponsor for new district:
- Date application submitted or anticipated:
- Proposed source(s) of supply for new district:

v. If a public water supply will not be used, describe plans to provide water supply for the project:

vi. If water supply will be from wells (public or private), maximum pumping capacity: gallons/minute.

d. Will the proposed action generate liquid wastes? Yes ☑ No ☐
If Yes:

i. Total anticipated liquid waste generation per day: 1.67M gallons/day

ii. Nature of liquid wastes to be generated (e.g., sanitary wastewater, industrial; if combination, describe all components and approximate volumes or proportions of each): Sanitary wastewater. This 1.67MGD will be directed to the Bergen Point WWTP.

iii. Will the proposed action use any existing public wastewater treatment facilities? Yes ☐ No ☑
If Yes:

- Name of wastewater treatment plant to be used: Bergen Point Wastewater Treatment Plant
- Name of district: Suffolk County Southwest Sewer District #3
- Does the existing wastewater treatment plant have capacity to serve the project? Yes ☑ No ☐
- Is the project site in the existing district? Yes ☐ No ☑
- Is expansion of the district needed? Parcels for the SSD3 laterals are located within the district, while parcels in the Carls River and Connetquot River expansion areas are not. Yes ☐ No ☑
Do existing sewer lines serve the project site? ☑ Yes ☐ No *
Will line extension within an existing district be necessary to serve the project? ☑ Yes ☐ No

- If Yes:
  - Describe extensions or capacity expansions proposed to serve this project:

The project would install service laterals connecting residential parcels in SSD #3 to existing collection and conveyance systems terminating at Suffolk County’s Bergen Point WWTP and would construct a new collection system to connect residential parcels to existing conveyance and treatment systems in the Carls River and Connetquot River Expansion Areas.

iv. Will a new wastewater (sewage) treatment district be formed to serve the project site? ☐ Yes ☑ No

- If Yes:
  - Applicant/sponsor for new district: ________________________________
  - Date application submitted or anticipated: _________________________
  - What is the receiving water for the wastewater discharge?  
    _______________________________________________________________

v. If public facilities will not be used, describe plans to provide wastewater treatment for the project, including specifying proposed receiving water (name and classification if surface discharge, or describe subsurface disposal plans):

  _______________________________________________________________

vi. Describe any plans or designs to capture, recycle or reuse liquid waste: ________________________________

   _______________________________________________________________
   _______________________________________________________________
   _______________________________________________________________
   _______________________________________________________________

- e. Will the proposed action disturb more than one acre and create stormwater runoff, either from new point sources (i.e. ditches, pipes, swales, curbs, gutters or other concentrated flows of stormwater) or non-point source (i.e. sheet flow) during construction or post construction? ☑ Yes ☐ No

- If Yes: The proposed action will disturb more than one acre during construction; with the exception of pump stations, all resulting structures will be subsurface and will not generate additional stormwater post construction. Construction of new pump stations will result in 0.001 acres of impervious surface.

i. How much impervious surface will the project create in relation to total size of project parcel? 
   - Square feet or acres (impervious surface)
   - Study Area Size

ii. Describe types of new point sources. Construction-related point sources would include ditches for installation of sewer infrastructure.

iii. Where will the stormwater runoff be directed (i.e. on-site stormwater management facility/structures, adjacent properties, groundwater, on-site surface water or off-site surface waters)? Stormwater runoff will be directed to the groundwater.

   _______________________________________________________________

- iv. Does proposed plan minimize impervious surfaces, use pervious materials or collect and re-use stormwater? ☑ Yes ☐ No

f. Does the proposed action include, or will it use on-site, one or more sources of air emissions, including fuel combustion, waste incineration, or other processes or operations? ☑ Yes ☐ No

- If Yes, identify:
  - i. Mobile sources during project operations (e.g., heavy equipment, fleet or delivery vehicles)
    - None during operations. During the construction phase of the project, construction equipment will produce minor sources of air emissions.
  - ii. Stationary sources during construction (e.g., power generation, structural heating, batch plant, crushers)
    - None.
  - iii. Stationary sources during operations (e.g., process emissions, large boilers, electric generation)
    - None.

g. Will any air emission sources named in D.2.f (above), require a NY State Air Registration, Air Facility Permit, or Federal Clean Air Act Title IV or Title V Permit? ☐ Yes ☑ No

- If Yes:
  - i. Is the project site located in an Air quality non-attainment area? (Area routinely or periodically fails to meet ambient air quality standards for all or some parts of the year) ☐ Yes ☑ No
  - ii. In addition to emissions as calculated in the application, the project will generate:
    - __________ Tons/year (short tons) of Carbon Dioxide (CO2)
    - __________ Tons/year (short tons) of Nitrous Oxide (N2O)
    - __________ Tons/year (short tons) of Perfluorocarbons (PFCs)
    - __________ Tons/year (short tons) of Sulfur Hexafluoride (SF6)
    - __________ Tons/year (short tons) of Carbon Dioxide equivalent of Hydrofluorocarbons (HFCs)
    - __________ Tons/year (short tons) of Hazardous Air Pollutants (HAPs)
h. Will the proposed action generate or emit methane (including, but not limited to, sewage treatment plants, landfills, composting facilities)?
   - Yes ☐ No ☑

   If Yes:
   i. Estimate methane generation in tons/year (metric):
   ________________________________________________________________

   ii. Describe any methane capture, control or elimination measures included in project design (e.g., combustion to generate heat or electricity, flaring):
   ________________________________________________________________

i. Will the proposed action result in the release of air pollutants from open-air operations or processes, such as quarry or landfill operations?
   - Yes ☐ No ☑

   If Yes: Describe operations and nature of emissions (e.g., diesel exhaust, rock particulates/dust):
   ________________________________________________________________

j. Will the proposed action result in a substantial increase in traffic above present levels or generate substantial new demand for transportation facilities or services?
   - Yes ☐ No ☑

   If Yes:
   i. When is the peak traffic expected (Check all that apply): ☐ Morning ☐ Evening ☐ Weekend ☐ Randomly between hours of _______ to _______.

   ii. For commercial activities only, projected number of semi-trailer truck trips/day:
   ________________________________________________________________

   iii. Parking spaces: Existing _________ Proposed _________ Net increase/decrease _________

   iv. Does the proposed action include any shared use parking?
   - Yes ☐ No ☑

   v. If the proposed action includes any modification of existing roads, creation of new roads or change in existing access, describe:
   ________________________________________________________________

   vi. Are public/private transportation service(s) or facilities available within ½ mile of the proposed site?
   - Yes ☐ No ☑

   vii. Will the proposed action include access to public transportation or accommodations for use of hybrid, electric or other alternative fueled vehicles?
   - Yes ☐ No ☑

   viii. Will the proposed action include plans for pedestrian or bicycle accommodations for connections to existing pedestrian or bicycle routes?
   - Yes ☐ No ☑

k. Will the proposed action (for commercial or industrial projects only) generate new or additional demand for energy?
   - Yes ☐ No ☑

   If Yes:
   i. Estimate annual electricity demand during operation of the proposed action:
   .........................................................................................

   ii. Anticipated sources/suppliers of electricity for the project (e.g., on-site combustion, on-site renewable, via grid/local utility, or other): via local grid

   iii. Will the proposed action require a new, or an upgrade to, an existing substation?
   - Yes ☐ No ☑

l. Hours of operation. Answer all items which apply.

   i. During Construction:
   - Monday - Friday: 7:00am - 3:00pm
   - Saturday: None
   - Sunday: None
   - Holidays: None

   ii. During Operations: 7 days per week
   - Monday - Friday: ____________________________
   - Saturday: ____________________________
   - Sunday: ____________________________
   - Holidays: ____________________________

   * or as union labor agreements stipulate
m. Will the proposed action produce noise that will exceed existing ambient noise levels during construction, operation, or both?  

Yes  No

If yes:

i. Provide details including sources, time of day and duration:

| Noise will be controlled by compliance with local construction/noise ordinances. During construction, noise sources include a small bucket backhoe for the excavation of utility trenches for sewer mains and service laterals. Noise associated with construction and operation of pump stations would be minimal. No noise sources would exceed ambient noise levels during operations. |

ii. Will proposed action remove existing natural barriers that could act as a noise barrier or screen?  

Describe:

n. Will the proposed action have outdoor lighting?  

Yes  No

If yes:

i. Describe source(s), location(s), height of fixture(s), direction/aim, and proximity to nearest occupied structures:

ii. Will proposed action remove existing natural barriers that could act as a light barrier or screen?  

Describe:

o. Does the proposed action have the potential to produce odors for more than one hour per day?  

Yes  No

If Yes, describe possible sources, potential frequency and duration of odor emissions, and proximity to nearest occupied structures:

p. Will the proposed action include any bulk storage of petroleum (combined capacity of over 1,100 gallons) or chemical products 185 gallons in above ground storage or any amount in underground storage?  

Yes  No

If Yes:

i. Product(s) to be stored

ii. Volume(s) ______ per unit time ________ (e.g., month, year)

iii. Generally describe proposed storage facilities:

q. Will the proposed action (commercial, industrial and recreational projects only) use pesticides (i.e., herbicides, insecticides) during construction or operation?  

Yes  No

If Yes:

i. Describe proposed treatment(s):

ii. Will the proposed action use Integrated Pest Management Practices?  

Yes  No

r. Will the proposed action (commercial or industrial projects only) involve or require the management or disposal of solid waste (excluding hazardous materials)?  

Yes  No

If Yes:

i. Describe any solid waste(s) to be generated during construction or operation of the facility:

| Construction: 209,824 tons per 9 months (unit of time)  
| Operation  NA tons per _______ (unit of time) |

ii. Describe any proposals for on-site minimization, recycling or reuse of materials to avoid disposal as solid waste:

| Construction: Suitable soils from trenching for installation of pipes would be sidecast for later use as backfill |
| Operation: NA |

iii. Proposed disposal methods/facilities for solid waste generated on-site:

| Construction: Any solid waste generated during construction activity which could not be utilized for backfill (estimated to be 10% of excavated material) would be hauled off site and disposed of at a municipal landfill or other certified solid waste disposal facility |
| Operation: NA |
s. Does the proposed action include construction or modification of a solid waste management facility? □ Yes ☑ No
If Yes:
   i. Type of management or handling of waste proposed for the site (e.g., recycling or transfer station, composting, landfill, or other disposal activities):
   
   ii. Anticipated rate of disposal/processing:
       • _____ Tons/month, if transfer or other non-combustion/thermal treatment, or
       • _____ Tons/hour, if combustion or thermal treatment
   
   iii. If landfill, anticipated site life: ________________________________ years
   
   t. Will proposed action at the site involve the commercial generation, treatment, storage, or disposal of hazardous waste? □ Yes ☑ No
   If Yes:
   i. Name(s) of all hazardous wastes or constituents to be generated, handled or managed at facility:

   ii. Generally describe processes or activities involving hazardous wastes or constituents:

   iii. Specify amount to be handled or generated _____ tons/month
   
   iv. Describe any proposals for on-site minimization, recycling or reuse of hazardous constituents:

   v. Will any hazardous wastes be disposed at an existing offsite hazardous waste facility? □ Yes ☑ No
   If Yes: provide name and location of facility:

   If No: describe proposed management of any hazardous wastes which will not be sent to a hazardous waste facility:

E. Site and Setting of Proposed Action

E.1. Land uses on and surrounding the project site

   a. Existing land uses.
      i. Check all uses that occur on, adjoining and near the project site.
         ☑ Urban ☑ Industrial ☑ Commercial ☑ Residential (suburban) ☑ Rural (non-farm)
         ☑ Forest ☑ Agriculture ☑ Aquatic ☑ Other (specify): ____________________________________
      
      ii. If mix of uses, generally describe:
         The project area occupies +/- 31,900 acres (see Figure 1) and is comprised of varying land uses.

   b. Land uses and covertypes on the project site.

c. Is the project site presently used by members of the community for public recreation?  [ ] Yes [x] No
   i. If Yes: explain: Public recreation areas in the project vicinity are detailed in Section C4d. The project would not impact use of these public areas.

d. Are there any facilities serving children, the elderly, people with disabilities (e.g., schools, hospitals, licensed day care centers, or group homes) within 1500 feet of the project site?  [x] Yes [ ] No
   i. Identify Facilities:
      See Supplemental Information (Attached)

e. Does the project site contain an existing dam?  [ ] Yes [x] No
   i. Dimensions of the dam and impoundment:
      • Dam height: _______________________________ feet
      • Dam length: ______________________________ feet
      • Surface area: _______________________________ acres
      • Volume impounded: _______________________________ gallons OR acre-feet
   ii. Dam's existing hazard classification:
   iii. Provide date and summarize results of last inspection:

f. Has the project site ever been used as a municipal, commercial or industrial solid waste management facility, or does the project site adjoin property which is now, or was at one time, used as a solid waste management facility?  [ ] Yes [x] No
   i. Has the facility been formally closed?  [ ] Yes [ ] No
      • If yes, cite sources/documentation:
   ii. Describe the location of the project site relative to the boundaries of the solid waste management facility:
   iii. Describe any development constraints due to the prior solid waste activities:

g. Have hazardous wastes been generated, treated and/or disposed of at the site, or does the project site adjoin property which is now or was at one time used to commercially treat, store and/or dispose of hazardous waste?  [x] Yes [ ] No
   i. Describe waste(s) handled and waste management activities, including approximate time when activities occurred:
      See Supplemental Information (Attached)

h. Potential contamination history. Has there been a reported spill at the proposed project site, or have any remedial actions been conducted at or adjacent to the proposed site?  [x] Yes [ ] No
   i. Is any portion of the site listed on the NYSDEC Spills Incidents database or Environmental Site Remediation database? Check all that apply:
      • [ ] Yes – Spills Incidents database  Provide DEC ID number(s): ________________________________
      • [x] Yes – Environmental Site Remediation database  Provide DEC ID number(s): See Supplemental Information (Attached)
      • [ ] Neither database
   ii. If site has been subject of RCRA corrective activities, describe control measures:
   iii. Is the project within 2000 feet of any site in the NYSDEC Environmental Site Remediation database?  [x] Yes [ ] No
      If yes, provide DEC ID number(s): See Supplemental Information (Attached)
   iv. If yes to (i), (ii) or (iii) above, describe current status of site(s):
      See Supplemental Information (Attached)
v. Is the project site subject to an institutional control limiting property uses? □ Yes □ No
   • If yes, DEC site ID number: _______________________________________________________
   • Describe the type of institutional control (e.g., deed restriction or easement): __________________________
   • Describe any use limitations: ___________________________________________________________
   • Describe any engineering controls: _______________________________________________________
   • Will the project affect the institutional or engineering controls in place? □ Yes □ No
   • Explain: ___________________________________________________________________________

E.2. Natural Resources On or Near Project Site

a. What is the average depth to bedrock on the project site? - 1,600 feet *

b. Are there bedrock outcroppings on the project site? □ Yes □ No
   If Yes, what proportion of the site is comprised of bedrock outcroppings? __________________%

c. Predominant soil type(s) present on project site:
   See D.2.a.iii above
   ___________________________________________ __________%  ___________________________________________ __________%  ___________________________________________ __________%

d. What is the average depth to the water table on the project site? Average: > 6.5 feet

e. Drainage status of project site soils:
   □ Well Drained: 72 % of site
   □ Moderately Well Drained: 14 % of site
   □ Poorly Drained 14 % of site

f. Approximate proportion of proposed action site with slopes:
   □ 0-10%: 100% of site
   □ 10-15%: 0% of site
   □ 15% or greater: 0% of site

g. Are there any unique geologic features on the project site? □ Yes □ No
   If Yes, describe: _____________________________________________________________________________________________
   __________________________________________________________________________________________________________

h. Surface water features.
   i. Does any portion of the project site contain wetlands or other waterbodies (including streams, rivers, ponds or lakes)? □ Yes □ No
   ii. Do any wetlands or other waterbodies adjoin the project site? □ Yes □ No
   If Yes to either i or ii, continue. If No, skip to E.2.i.
   iii. Are any of the wetlands or waterbodies within or adjoining the project site regulated by any federal, state or local agency? □ Yes □ No
   iv. For each identified regulated wetland and waterbody on the project site, provide the following information:
      • Streams: Name Classification
      • Lakes or Ponds: Name _________________________________________________________________________________________
      • Wetlands: Name ____________________________________________________________________________________________
      • Wetland No. (if regulated by DEC) ___________________________________________________________________________
   v. Are any of the above water bodies listed in the most recent compilation of NYS water quality-impaired waterbodies? □ Yes □ No
      If yes, name of impaired water body/bodies and basis for listing as impaired: ____________________________
      __________________________________________________________________________________________________________

i. Is the project site in a designated Floodway? □ Yes □ No

j. Is the project site in the 100 year Floodplain? □ Yes □ No

k. Is the project site in the 500 year Floodplain? □ Yes □ No

l. Is the project site located over, or immediately adjoining, a primary, principal or sole source aquifer? □ Yes □ No
   i. Name of aquifer: Nassau-Suffolk SSA

* Source: Soren et al., 1987; https://productforums.google.com/forum/#!topic/gec-nature-science-moderated/0KmCgWUFWpA
m. Identify the predominant wildlife species that occupy or use the project site:
Small mammals such as Eastern gray squirrel (Sciurus carolinensis) and cosmopolitan bird species such as American robin (Turdus migratorius), blue-jay (Cyanocitta cristata), mourning dove (Zenaida macroura), house sparrow (Passer domesticus), and European starling (Sturnus vulgaris).

n. Does the project site contain a designated significant natural community?  
Yes  No

If Yes:

i. Describe the habitat/community (composition, function, and basis for designation): The project area contains:

Red Maple-Blackgum Swamp; Coastal Oak-Hickory Forest; Coastal Oak-Heath Forest; Pitch Pine-Oak Forest

ii. Source(s) of description or evaluation: NYSDEC EAF Mapper

iii. Extent of community/habitat:
- Currently: 523.57; 373.41; 304.5; 80.04 acres
- Following completion of project as proposed: 523.57; 373.41; 304.5; 80.04 acres
- Gain or loss (indicate + or -): 0 acres

o. Does project site contain any species of plant or animal that is listed by the federal government or NYS as endangered or threatened, or does it contain any areas identified as habitat for an endangered or threatened species?
Yes  No

According to a search of the U.S. Fish and Wildlife Service's Information for Planning and Conservation (IpaC) system, the project area contains the species listed below:

Birds: Piping Plover (Charadrius melodus), Red Knot (Calidris canutus rufa), Roseate Tern (Sterna dougallii dougallii)
Flowering Plants: Sandplain Gerardia (Agalinis acuta), Seabeach Amaranth (Amaranthus pumilus)
Mammals: Northern Long-eared Bat (Myotis septentrionalis)

p. Does the project site contain any species of plant or animal that is listed by NYS as rare, or as a species of special concern?
Yes  No

q. Is the project site or adjoining area currently used for hunting, trapping, fishing or shell fishing?
Yes  No

If yes, give a brief description of how the proposed action may affect that use:

E.3. Designated Public Resources On or Near Project Site

a. Is the project site, or any portion of it, located in a designated agricultural district certified pursuant to Agriculture and Markets Law, Article 25-AA, Section 303 and 304?
Yes  No

If Yes, provide county plus district name/number:

b. Are agricultural lands consisting of highly productive soils present?
Yes  No

i. If Yes: acreage(s) on project site?

ii. Source(s) of soil rating(s):

The project activities would occur in close proximity to the following areas: Sanrapoque Creek Tidal Wetland, Mud Creek, Sanrapoque Creek FWW, Bergon Point addition, Ketcham's Creek, Sanrapoque Creek Tidal Wetland, Bergon Point addition, Mud Creek, Sanrapoque Creek FWW, Ketcham's Creek.

f. Designating agency and date:

E.4. Critical Environmental Areas (CEA) On or Near Project Site

a. Is the project site located in or does it adjoin a state listed Critical Environmental Area?
Yes  No

If Yes:

i. CEA name:

ii. Basis for designation:

iii. Designating agency and date:

Agencies: Suffolk County, Date:2-10-88; Babylon, Town of, Date:10-30-88, Suffolk County, Date:2-10-88
Does the project site contain, or is it substantially contiguous to, a building, archaeological site, or district which is listed on, or has been nominated by the NYS Board of Historic Preservation for inclusion on, the State or National Register of Historic Places? ☑ Yes ☐ No

If Yes:

i. Nature of historic/archaeological resource: ☐ Archaeological Site ☑ Historic Building or District

ii. Name: See supplemental information (attached)

iii. Brief description of attributes on which listing is based:

Phase I A Archaeological Sensitivity Assessment and Phase I A Architectural Survey for Southwest Sewer District #3, Carls River, and Conneququot River Sewer Project, Babylon and Islip, NY is being submitted to NY SHPO.

f. Is the project site, or any portion of it, located in or adjacent to an area designated as sensitive for archaeological sites on the NY State Historic Preservation Office (SHPO) archaeological site inventory? ☑ Yes ☐ No

g. Have additional archaeological or historic site(s) or resources been identified on the project site? ☐ Yes ☑ No

If Yes:

i. Describe possible resource(s): The reports will be submitted for SHPO review. Findings are summarized in the attached supplemental information and will be incorporated into the environmental review.

ii. Basis for identification:

h. Is the project site within five miles of any officially designated and publicly accessible federal, state, or local scenic or aesthetic resource? ☑ Yes ☐ No

If Yes:

i. Identify resource:

ii. Nature of, or basis for, designation (e.g., established highway overlook, state or local park, state historic trail or scenic byway, etc.):

iii. Distance between project and resource: _________ miles.

i. Is the project site located within a designated river corridor under the Wild, Scenic and Recreational Rivers Program 6 NYCRR 666? ☑ Yes ☐ No

If Yes:

i. Identify the name of the river and its designation:

ii. Is the activity consistent with development restrictions contained in 6NYCRR Part 666? ☑ Yes ☐ No

F. Additional Information

Attach any additional information which may be needed to clarify your project.

If you have identified any adverse impacts which could be associated with your proposal, please describe those impacts plus any measures which you propose to avoid or minimize them.

G. Verification

I certify that the information provided is true to the best of my knowledge.

Applicant/Sponsor Name: John Donovan Date: 1/8/2018

Louis Berger’s reconnaissance survey identified 11 potentially eligible historic districts and 20 individual properties that may be eligible for listing in the NRHP. The construction of a new sewer collection system in the overall project area has very little potential to adversely affect historic architectural resources as they will be constructed within the existing right-of-way or will involve minimal disturbance to parcels and buildings. If proposed construction activities will occur outside already disturbed areas within these identified sensitive areas, then Phase IB subsurface testing is recommended to determine if preserved archaeological sites are present.

The following 11 potentially eligible historic districts were identified in the project area.
1. Nineteenth- through early twentieth-century dwellings on Broadway, Amityville
2. Early twentieth-century residences on Park Avenue, Amityville
3. Nineteenth- through early twentieth-century commercial buildings, Amityville
4. Late nineteenth- to early twentieth-century residences on Roosevelt Street, Babylon
5. Colonial Revival and Tudor Revival dwellings on Sequams Lane, West Islip
6. Colonial Revival dwellings on Windsor Avenue, Brightwaters
7. Late nineteenth- to early twentieth-century estates on Awixa Avenue, Bay Shore
8. Turn-of-the-twentieth-century Queen Anne dwellings on Maple Avenue, Bay Shore
9. Tudor Revival, Stick, Shingle, and Italianate dwellings on Ocean Avenue, Bay Shore
10. Brightwaters Development by Thomas Benton Ackerson, Lakeview Avenue and Concourse West vicinity
11. O’Conee Estates

The following individual properties that have potential to be eligible for the NRHP were also identified. In most cases these properties are earlier estates surrounded by postwar development.
1. Brick postwar residences, Benurb Street, Amityville
2. Early twentieth-century residences on Sterling Place, Amityville
3. Turn-of-the-twentieth-century Queen Anne residences on Ketchum Avenue, Amityville
4. Early twentieth-century residences near South Broadway, Lindenhurst
5. Early twentieth-century residences near South 1st Street, Lindenhurst
6. Brick office complex, 325 Little East Neck Road North, Babylon
7. Early twentieth-century estates on Magoun Road, West Islip
8. Carriage House Apartments, 535 Keith Lane, West Islip
9. Oak Neck Estates, Oak Neck Lane, West Islip
10. Arnold Manor, Montauk Highway, West Islip
11. Early twentieth-century estate on Gladstone Avenue, West Islip
12. Turn-of-the-twentieth-century farmhouse, Greenwood Road, Bay Shore
13. Twentieth-century vernacular dwelling, East Madison Street
14. Early twentieth-century estates on Meadowfarm Road, East Islip
15. Early twentieth-century estates on Blackmore Lane, East Islip
16. Knapp Estate and Brookwood Hall, Irish Lane, East Islip
17. Early twentieth-century residences on South Bay Avenue, Islip
18. Early twentieth-century residences on Union Avenue, Islip
19. Early twentieth-century residences on Cedar Avenue, Islip
20. Early twentieth-century estates on South Saxon Avenue, Bay Shore
