

Governor's Office of Storm Recovery

ANDREW M. CUOMO
Governor

November 14, 2018

Dear Oakdale Resident:

Since the community meeting held on October 2nd at the West Sayville Fire House, the Governor's Office of Storm Recovery has reviewed the public comments received during and after the meeting, including e-mails and a petition. The Office is working with the engineering firm of Louis Berger to prepare a technical response to those comments as they pertain to the substance of the Alternatives Analysis Report. This will be circulated when completed.

While the technical response is being prepared, we wanted to thank you for your feedback and let you know GOSR will not be moving forward with the project.

This message is being sent to all legible e-addresses on the Sign-In Sheet as well as those signees of the petition who provided e-addresses. Please share this e-mail with those of your neighbors who do not have e-mail addresses or whose names you don't see in the distribution list.

Valerie
