The Governor's Office of Storm Recovery (GOSR), an office of New York State Homes and Community Renewal's (NYSHCR) Housing Trust Fund Corporation (HTFC), has established Lead Agency status pursuant to the State Environmental Quality Review Act (SEQRA) (ECL Sections 3-0301(1)(b), 3-0301(2)(m) and 8-0113 and 6 NYCRR Part 617) for the environmental review of the proposed Village of Nichols: Recreation Improvements (Proposed Project), which involves construction at two adjacent locations: Kirby Park at East River Road (NYS Route 502) and at a Village of Nichols owned parcel at West River Road (NYS Route 282), Village of Nichols, Town of Nichols, Tioga County, New York 13812. In accordance with SEQRA and its implementing regulations found at 6 NYCRR Part 617, GOSR has established itself as SEQRA lead agency and has classified the proposed action a Type I Action. A Full Environmental Assessment Form (EAF) Part 1 regarding the proposed action has been circulated for review and comment to interested and involved agencies. GOSR has evaluated the criteria found under 6 NYCRR 617.7(c), completed Parts 2 and 3 of the EAF, and determined that the proposed action would not result in significant environmental impacts. This memo is incorporated by reference into Part 3 of the EAF and serves as the rationale for GOSR's determination of significance.

Village of Nichols: Recreation Improvements Project  
Negative Declaration – August 31, 2018

**The Proposed Project:**

The Village of Nichols: Recreation Improvements involves construction at two adjacent locations: Kirby Park at East River Road (NYS Route 502) and at a Village of Nichols owned parcel at West River Road (NYS Route 282), Village of Nichols, Town of Nichols, Tioga County, New York 13812. The Village of Nichols is requesting CDBG-DR funding for recreational improvements to Kirby Park and the creation of a new village park, Veterans Memorial Park.

The recreational improvements to Kirby Park will include the following: installation of new park signs and lighting, multi-use trails, a pedestrian walkway, a children's play area, portable toilet facilities, constructing new parking in the northern portion of Kirby Park with increased handicapped accessible parking, resiliency landscaping, upgrading Kirby Park's perimeter and entrance, improving the southern parcel of Kirby Park with secondary parking, and repositioning the practice baseball field, pavilion, and basketball court.

The Proposed Project will also involve the creation of a new village park called Veterans Memorial Park, to be located on another village owned parcel of property located in the Village of Nichols. The Veterans Memorial Park will be a small outdoor space that conserves the existing landscape and supports the surrounding landscape and local wildlife. The new public park area will improve the overall fitness of the Village of Nichols. The creation of the park will involve the installation of a landscaped park entrance with a park sign along West River Road, benches, and a five to six foot-wide park walkway along a loop configuration that will be approximately 65 feet long. Additional amenities will potentially include lighting and a Veteran's Memorial with flagpole(s). The Park site will be limited to the Village-owned parcel. A safe and feasible pedestrian link along West River Road from the Village to the park entrance is also proposed, if funding allows.

**Purpose and Need:**

During Tropical Storm Lee, the Wappasening Creek rose over its banks and flooded 90% of Kirby Park. The flood waters washed away goal posts, caused structural damage to existing park facilities, and left the grounds unusable due to mud and debris. The Proposed Project will provide an economic benefit to the area by enhancing tourism and recreation opportunities for visitors while improving the residents' overall quality of life by increasing active recreation.

The Proposed Project includes enhancements to Kirby Park that are intended to increase flood resiliency to make the park's amenities more flood-resistant and reduce the amount of damage and debris clean-up after storms, while simultaneously improving the quality of life for residents. Additionally, the creation of Veterans Memorial Park, a pocket park located within the commercial district and out of floodplain, is designed to meet the recreation needs of children, seniors, and those browsing the commercial district.

**Existing Conditions:**

The Proposed Project is located in Southern Tioga County, along the Susquehanna River. Tioga County is largely characterized by forested and agricultural lands. The Proposed Project is located within the mixed residential and commercial development of the Village of Nichols, located immediately south of the Southern Tier Expressway and Susquehanna River. Kirby Park is an existing recreational area located east of the levee protecting the Village from the floodplain associated with Wappasening Creek and Susquehanna River. The proposed parcel for the Veterans Memorial Park is currently an undeveloped parcel located west of Kirby Park, off of River Road. Kirby Park is the heart of the Village and the Town of Nichols, with residents in the area utilizing the facility every weekend for community and individual events. Unfortunately, this park has regularly been inundated with floodwaters, which undermine the

Village of Nichols: Recreation Improvements Project  
Negative Declaration – August 31, 2018

existing structures and roadways while impacting the levee by depositing mud and silt within the floodplain. The recreational structures at Kirby Park were completely destroyed during Tropical Storm Lee, with only the major structures such as the pavilion remaining. Other items, such as a nearly 300 pound cement picnic table, were transported across the length of the park by the floodwaters. Due to the expense of regular flooding at this facility, the area has come to rely on volunteers to help repair and clean the park after flood events.

**Funding:**

The total Proposed Project cost is estimated at \$850,000.00. GOSR proposes to allocate funding pursuant to the HUD CDBG-DR program as authorized by the Disaster Relief Appropriations Act of 2013 (Public Law 113-2, approved January 29, 2013). The NYS HTFC, which administers the CDBG-DR program funds on behalf of GOSR, intends to approve funding for the Proposed Project as described in this notice.

**Environmental Considerations:**

The SEQRA EAF Parts 1 and 2 assessed multiple resource topics, and no potential impacts were identified. The SEQRA analysis finds that the Proposed Project will not result in a significant adverse environmental impact. Additional explanation is provided for those sections of the SEQRA EAF Part 2 where details may be helpful in understanding the environmental considerations. The applicable SEQRA EAF Part 2 section number is followed by the additional explanation below.

Section 1 – Impact on Land

Physical alteration of the land will be minimal and will take place in association with the installation of footings for the new pavilion location, appropriate grading for the installation/repositioning of new or existing structures, the installation of signs, the installation of utilities and associated infrastructure, and installation of plants and trees for resiliency landscaping.

Section 5 – Impact on Flooding

The Proposed Project is located within a Special Flood Hazard Area (100-year floodplain). An 8-step decision making process was completed pursuant to 24 CFR 55.20. The Floodplain Management (Executive Order 11988) and Wetlands Protection (Executive Order 11990) Determination for the Proposed Project is included in the Environmental Review Record.

Section 10 – Impact on Historic and Archeological Resources

The Proposed Project will not impact historic or archeological resources. On June 7, 2018, the New York State Historic Preservation Office (SHPO) determined that the Proposed Project will have No Impact upon cultural resources listed in or determined eligible for inclusion in the State and National Register of Historic Places.

In the event of any inadvertent discoveries of human remains and/or cultural resources including, but not limited to, funerary objects, sacred objects and objects of cultural patrimony are made during execution of the Proposed Project scope, then work shall be halted immediately and the SHPO and THPO of all appropriate Tribes, Nations and Communities shall be consulted before work can be resumed.

Section 15 – Impact on Noise, Odor, and Light

The Proposed Project use is not a noise-sensitive use. The Proposed Project activities are not expected to generate excessive noise during the short-term construction work and will adhere to local noise control standards. The Proposed Project activities will be completed in accordance with all applicable federal, state and local laws, regulations, and permit requirements and conditions. Therefore, the Proposed Project's construction and its completion resulting in a free-flowing waterway is not expected to generate any

Village of Nichols: Recreation Improvements Project  
Negative Declaration – August 31, 2018

significant adverse noise impacts.

**Standard Requirements:**

Any change to the Proposed Project as described will require re-evaluation by GOSR's Certifying Officer for compliance with SEQRA and other law, regulations and policies.

This review does not address all federal, state and local requirements. Acceptance of federal funding requires recipient to comply with all federal, state and local laws. Failure to obtain all appropriate federal, state and local environmental permits and clearances may jeopardize federal funding.

**Additional Mitigation Measures:**

To the extent required and/or practicable and applicable, any approval of the Proposed Project is subject to the following mitigation measures being adhered to by the grant recipient to minimize environmental impacts and create a more sustainable project:

- Construction and demolition – to the maximum extent possible, utilize local and recycled materials in construction process and recycle materials generated onsite.
- Clean diesel – implement diesel controls, cleaner fuel, and cleaner construction practices for on-road and off-road equipment used for transportation, soil movement, or other construction activities, including:
  - Strategies and technologies that reduce unnecessary idling, including auxiliary power units, the use of electric equipment, and strict enforcement of idling limits; and
  - Use of clean diesel through add-on control technologies like diesel particulate filters and diesel oxidation catalysts, repowers, or newer, cleaner equipment.
- Stormwater – utilize low impact development (LID) principles such as minimizing effective imperviousness to create site drainage, and the planting of native and non-invasive vegetation on the project site for stormwater management purposes. Other LID practices can include bioretention facilities, rain gardens, vegetated rooftops, rain barrels, and permeable pavements;
- Cost-efficient, environmentally friendly landscaping – EPA's GreenScapes program provides cost-efficient and environmentally friendly solutions for landscaping;
- Energy efficiency – energy-efficient technologies should be incorporated, when possible; and
- Water conservation and efficiency – promote water conservation and efficiency through use of water efficient products (toilets, faucets, showerheads) and practices. Consider use of products with the WaterSense label where appropriate.

In addition to the factors considered above, the GOSR considered the following guidance from the State Environmental Quality Review Act and its implementing regulations and determined that the Proposed Project would:

- (i) Not result in "a substantial adverse change in existing air quality, ground or surface water quality or quantity, traffic or noise levels; a substantial increase in solid waste production; a substantial increase in potential for erosion, flooding, leaching or drainage problems;" (§617.7(c)(1)( i ))

Village of Nichols: Recreation Improvements Project  
Negative Declaration – August 31, 2018

- (ii) Not result in “the removal or destruction of large quantities of vegetation or fauna; substantial interference with the movement of any resident or migratory fish or wildlife species; impacts on a significant habitat area; substantial adverse impacts on a threatened or endangered species of animal or plant, or the habitat of such a species; or other significant adverse impacts to natural resources;” (§617.7(c)(1)(iii))
- (iii) Not result in “the impairment of the environmental characteristics of a Critical Environmental Area as designated pursuant to subdivision 617.14(g) of this Part;” (§617.7(c)(1)(iii))
- (iv) Not result in “the creation of a material conflict with a community’s current plans or goals as officially approved or adopted;” (§617.7(c)(1)(iv))
- (v) Not result in “the impairment of the character or quality of important historical, archaeological, architectural, or aesthetic resources or of existing community or neighborhood character;” (§617.7(c)(1)(v))
- (vi) Not result in “a major change in the use of either the quantity or type of energy;” (§617.7(c)(1)(vi))
- (vii) Not result in “the creation of a hazard to human health;” (§617.7(c)(1)(vii))
- (viii) Not result in “a substantial change in the use, or intensity of use, of land including agricultural, open space or recreational resources, or in its capacity to support existing uses;” (§617.7(c)(1)(viii))
- (ix) Not result in “the encouraging or attracting of a large number of people to a place or places for more than a few days, compared to the number of people who would come to such place absent the action;” (§617.7(c)(1)(ix))
- (x) Not result in “the creation of a material demand for other actions that would result in one of the above consequences;” (§617.7(c)(1)(x))
- (xi) Not result in “changes in two or more elements of the environment, no one of which has a significant impact on the environment, but when considered together result in a substantial adverse impact on the environment; or (§617.7(c)(1)(xi))

Village of Nichols: Recreation Improvements Project  
Negative Declaration – August 31, 2018

Therefore, GOSR, acting as Lead Agency, and having prepared a Full Environmental Assessment Form, has determined that the Proposed Action will not have a significant effect on the environment and a Draft Environmental Impact Statement will not need to be prepared.

**Full Environmental Assessment Form**  
**Part 2 - Identification of Potential Project Impacts**

Project :

Date :

**Part 2 is to be completed by the lead agency.** Part 2 is designed to help the lead agency inventory all potential resources that could be affected by a proposed project or action. We recognize that the lead agency's reviewer(s) will not necessarily be environmental professionals. So, the questions are designed to walk a reviewer through the assessment process by providing a series of questions that can be answered using the information found in Part 1. To further assist the lead agency in completing Part 2, the form identifies the most relevant questions in Part 1 that will provide the information needed to answer the Part 2 question. When Part 2 is completed, the lead agency will have identified the relevant environmental areas that may be impacted by the proposed activity.

If the lead agency is a state agency **and** the action is in any Coastal Area, complete the Coastal Assessment Form before proceeding with this assessment.

**Tips for completing Part 2:**

- Review all of the information provided in Part 1.
- Review any application, maps, supporting materials and the Full EAF Workbook.
- Answer each of the 18 questions in Part 2.
- If you answer “**Yes**” to a numbered question, please complete all the questions that follow in that section.
- If you answer “**No**” to a numbered question, move on to the next numbered question.
- Check appropriate column to indicate the anticipated size of the impact.
- Proposed projects that would exceed a numeric threshold contained in a question should result in the reviewing agency checking the box “Moderate to large impact may occur.”
- The reviewer is not expected to be an expert in environmental analysis.
- If you are not sure or undecided about the size of an impact, it may help to review the sub-questions for the general question and consult the workbook.
- When answering a question consider all components of the proposed activity, that is, the “whole action”.
- Consider the possibility for long-term and cumulative impacts as well as direct impacts.
- Answer the question in a reasonable manner considering the scale and context of the project.

***Full Environmental Assessment Form***  
***Part 3 - Evaluation of the Magnitude and Importance of Project Impacts***  
***and***  
***Determination of Significance***

Part 3 provides the reasons in support of the determination of significance. The lead agency must complete Part 3 for every question in Part 2 where the impact has been identified as potentially moderate to large or where there is a need to explain why a particular element of the proposed action will not, or may, result in a significant adverse environmental impact.

Based on the analysis in Part 3, the lead agency must decide whether to require an environmental impact statement to further assess the proposed action or whether available information is sufficient for the lead agency to conclude that the proposed action will not have a significant adverse environmental impact. By completing the certification on the next page, the lead agency can complete its determination of significance.

**Reasons Supporting This Determination:**

To complete this section:

- Identify the impact based on the Part 2 responses and describe its magnitude. Magnitude considers factors such as severity, size or extent of an impact.
- Assess the importance of the impact. Importance relates to the geographic scope, duration, probability of the impact occurring, number of people affected by the impact and any additional environmental consequences if the impact were to occur.
- The assessment should take into consideration any design element or project changes.
- Repeat this process for each Part 2 question where the impact has been identified as potentially moderate to large or where there is a need to explain why a particular element of the proposed action will not, or may, result in a significant adverse environmental impact.
- Provide the reason(s) why the impact may, or will not, result in a significant adverse environmental impact
- For Conditional Negative Declarations identify the specific condition(s) imposed that will modify the proposed action so that no significant adverse environmental impacts will result.
- Attach additional sheets, as needed.

**Determination of Significance - Type 1 and Unlisted Actions**

SEQR Status: ☐ Type 1 ☐ Unlisted

Identify portions of EAF completed for this Project: ☐ Part 1 ☐ Part 2 ☐ Part 3

Upon review of the information recorded on this EAF, as noted, plus this additional support information

and considering both the magnitude and importance of each identified potential impact, it is the conclusion of the \_\_\_\_\_ as lead agency that:

☐ A. This project will result in no significant adverse impacts on the environment, and, therefore, an environmental impact statement need not be prepared. Accordingly, this negative declaration is issued.

☐ B. Although this project could have a significant adverse impact on the environment, that impact will be avoided or substantially mitigated because of the following conditions which will be required by the lead agency:

There will, therefore, be no significant adverse impacts from the project as conditioned, and, therefore, this conditioned negative declaration is issued. A conditioned negative declaration may be used only for UNLISTED actions (see 6 NYCRR 617.d).

☐ C. This Project may result in one or more significant adverse impacts on the environment, and an environmental impact statement must be prepared to further assess the impact(s) and possible mitigation and to explore alternatives to avoid or reduce those impacts. Accordingly, this positive declaration is issued.

Re:     **Lead Agency Designation for Environmental Review of the Village of Nichols: Recreation Improvements Project:** located at Kirby Park at River Street (NYS Route 502), Village of Nichols, Town of Nichols, Tioga County New York 13812; and Village of Nichols owned parcel at West River Road (NYS Route 282), Village of Nichols, Town of Nichols, Tioga County, New York 13812

Dear Involved/Interested Agency:

The Governor's Office of Storm Recovery ("GOSR") proposes to serve as lead agency under the State Environmental Quality Review Act ("SEQRA") and related laws for the environmental review of the proposed work associated with the Village of Nichols: Recreation Improvements Project (the "Proposed Action"). GOSR is conducting an environmental review of the Proposed Action on behalf of the State of New York as the recipient of Community Development Block Grant - Disaster Recovery ("CDBG-DR") funds from the U.S. Department of Housing and Urban Development under 42 U.S.C. § 5304(g).<sup>1</sup>

The Proposed Action involves New York Rising Community Reconstruction (NYRCR) Program funding totaling \$850,000.00 for the Village of Nichols: Recreation Improvements, which involves construction at two (2) locations: Kirby Park at East River Road (NYS Route 502), Village of Nichols, Town of Nichols, Tioga County New York 13812, and at a Village of Nichols owned parcel at West River Road (NYS Route 282), Village of Nichols, Town of Nichols, Tioga County, New York. The Proposed Action will include recreational improvements to Kirby Park and the creation of a new village park, Veterans Memorial Park.

The recreational improvements to Kirby Park will include the following: installation of new park signs and lighting, multi-use trails, a pedestrian walkway, a children's play area, portable toilet facilities, constructing new parking in the northern portion of Kirby Park with increased handicapped accessible parking, resiliency landscaping, upgrading Kirby Park's perimeter and entrance, improving the southern parcel of Kirby Park with secondary parking, and repositioning the practice baseball field, pavilion, and basketball court.

The project will also involve the creation of a new village park called Veterans Memorial Park, to be located on another village owned parcel of property located in the Village of Nichols. The Veterans Memorial Park will be a small outdoor space that conserves the existing landscape and

supports the surrounding landscape and local wildlife. The new public park area will improve the overall fitness of the Village of Nichols. The creation of the park will involve the installation of a landscaped park entrance with a park sign along West River Road, benches, and a five to six foot-wide park walkway along a loop configuration that will be approximately 65 feet long. Additional amenities will potentially include lighting and a Veteran's Memorial with flagpole(s). The Park site will be limited to the Village-owned parcel. A safe and feasible pedestrian link along West River Road from the Village to the park entrance is also proposed, if funding allows.

Ground disturbance will be associated with the installation of footings for the new pavilion location, appropriate grading for the installation/repositioning of new or existing structures, the installation of signs, the installation of utilities and associated infrastructure, and installation of plants and trees for resiliency landscaping. The parcels are currently owned by the Village of Nichols and contain NYSDEC, NYSDOT and Water Well easements.

This action has been preliminarily classified as a TYPE I action pursuant to SEQRA. Additional information regarding the Proposed Action and its location are provided in the enclosed full Environmental Assessment Form. The review of the Proposed Action under SEQRA would satisfy the requirements of 6 NYCRR Part 617.

Your agency or organization has been identified as a potential cooperating, involved, or interested agency for the review and approval of the Proposed Action. We are **requesting that all identified involved agencies respond within 20 days, by August 29**, regarding GOSR serving as lead agency in order to expedite this review.
