NY Rising Community - Stony Point
Projects Passport
February 24, 2014

Stony Point is a vibrant and connected riverfront and hillside community. Our Vision is to preserve our town’s history and protect our people and our natural resources while making the community more resilient in the face of future hazards and attracting visitors to ensure an ecologically sound and economically strong future for the people of Stony Point.

Goals & Objectives

- Plan for better mobility and connectivity for people in cars, on foot, and with transit
- Cooperate with other regional entities
- Improve waterfront access and infrastructure
- Protect the watershed and strengthen stormwater management practices
- Redevelop historic assets while maintaining neighborhood fabric
- Foster emergency readiness
- Revitalize downtown businesses
- Develop design and construction standards for resilience
- Enhance historical, natural, and cultural attractions for tourists
- Retain and attract residents with a range of housing options

Priority Projects
1. Letchworth Village Utilization
2. Stony Point Center Retrofit
3. Shoreline Protection - Beach Road
4. Shoreline Protection - River Road
5. Rehabilitate Wastewater Interceptors
6. Wastewater Treatment Plant Hardening
7. Grassy Point Redevelopment

Featured Project
8. Interceptor Sewer Line Rehabilitation
9. Demolish Damaged/Abandoned Structures

Additional Questions
Please select the projects that you believe, if implemented, will...
- help the community recover from the next storm?
- provides the co-benefit of economic development?
- has the potential to make a regional impact?
- improves resiliency for low/moderate income residents?
- improves resiliency for other socially vulnerable populations?

Additional Comments or Concerns:
Directions

This passport contains one page for each of the potential priority projects. All of them are potentially eligible for the Community Development Block Grant - Disaster Recovery funding. Today we need your feedback in order to identify the priority projects that can result in a resilient Stony Point and be included in the final Recovery Plan.

1. **Visit each of the project posters** displayed around the room in order to learn more about their target area, capacity to increase resilience and reduce risk, and co-benefits. Committee members and planning consultants will be available to answer your questions about the projects.

2. **Share your local knowledge** about the projects by answering other questions in the passport and supplying additional information that can help to make the descriptions of the projects more robust and improve the feasibility of the projects in the final plan. If you do not have an answer to any of these questions, it is ok to leave them blank.

3. **Score each project** as High, Medium, or Low in your passport based on their potential to make Stony Point more resilient. These community support scores are one of many factors that will be used to evaluate projects for the final Recovery Plan.

   * **Priority Projects (Ranked 1 to 6)**
     - Likely eligible for CDBG-DR funding and can be implemented immediately

   * **Featured Project (Project 7 and 8)**
     - Longer-term project with a discrete first phase or study that is likely to be eligible for CDBG-DR funding or other funding source

   * **Other Resiliency Projects (Alphabetized A to Y, not ranked)**
     - May not be CDBG-DR eligible but selected by the committee to appear in the final plan

4. **Regroup at 8:40** for a final closing activity and wrap up.

5. **Please place your annotated Passport in the box** at the door as you leave.

---

**Reduce Residential Flood Insurance Rates**

Participate in the FEMA National Flood Insurance Program (NFIP) Community Rating System (CRS)

**Your Local Insights**

Consider these four questions. Please share your thoughts on this project to the best of your knowledge.

1. Is there any missing information or other details to be considered?
2. What are the potential challenges to implementing this project?
3. Does this duplicate any other efforts in the community?
4. What are the next steps for this project and who might support or advocate for its implementation?

---

Community Support Score

Consider this project’s alignment with the Vision and Goals & Objectives. Indicate the degree to which you believe that this project makes Stony Point more resilient.

1. Is there any missing information or other details to be considered?
2. What are the potential challenges to implementing this project?
3. Does this duplicate any other efforts in the community?
4. What are the next steps for this project and who might support or advocate for its implementation?

Community Support Score

Consider this project’s alignment with the Vision and Goals & Objectives. Indicate the degree to which you believe that this project makes Stony Point more resilient.

☐ High  ☐ Medium  ☐ Low

Comments:

Stony Point Center Retrofit

Install back up generators and create a stormwater connection to make the site more resilient

Watershed Evaluation and Intervention

Perform a comprehensive restoration assessment to identify restoration goals and associated performance metrics then develop restoration plan

Community Support Score

Consider this project’s alignment with the Vision and Goals & Objectives. Indicate the degree to which you believe that this project makes Stony Point more resilient.

☐ High  ☐ Medium  ☐ Low

Comments:

Assess Zoning Code

Determine if changes are required to the zoning code to address the rebuilding of homes, other buildings, and infrastructure located in the floodplain.

Alternate Low Income Housing Locations

Study and identify potential opportunities that will enable residents of mobile home parks in flood risk zones to relocate to areas outside of flood risk zones.
