Putnam County, NY
Effective Date: October 14, 2013
Executive Order 11988: Floodplain Management

New York State Homes and Community Renewal
Office of Community Renewal

U.S. Department of Housing and Urban Development
Community Development Block Grant - Disaster Recovery
Recreate NY Home Buyout & Acquisition Program

Putnam County, NY
Effective Date: October 14, 2013

This Floodplain Management Document meets the requirements of Executive Order 11988: Floodplain Management for the voluntary buyout and acquisitions of 1-2 unit homes in Putnam County, New York. The housing properties are participating in the U.S. Department of Housing and Urban Development (HUD) Community Development Block Grant Program (CDBG) as administered by the State of New York Action Plan For Community Development Block Grant Program – Disaster Recovery (CDBG-DR) (Program). This Program will be conducted in compliance with Executive Order 11988. It includes the reconstruction, improvement, financing, and use of existing properties located in a floodplain for which approval is required, either from HUD under any applicable HUD program, or from a grant recipient subject to 24 CFR Part 58. This document pertains to activities within the Special Flood Hazard Area (SFHA) as defined by the Federal Emergency Management Agency (FEMA), or its successors, pursuant to the National Flood Insurance Program (NFIP), or a successor program, whether advisory, preliminary, or final.

Description of Proposed Program Activities

The State of New York was awarded funding, to be administered by New York State Homes and Community Renewal (HCR), to provide financial assistance to homeowners whose residences were substantially damaged by storms Sandy, Lee and Irene within various counties in the state of New York, including Putnam County. HCR is awarding this funding in accordance with the State of New York Action Plan For Community Development Block Grant Program – Disaster Recovery (Action Plan). The Action Plan provides for, among other things, home buyout and acquisition assistance to owners of 1-2 unit family homes in Putnam County, New York (Action Plan Activities). “Buyouts” involve the purchase of properties located within a floodplain. Structures and improvements will be removed, and the parcel will be allowed to return to its natural state in perpetuity. “Acquisitions” also involve purchase of properties; however, the specific details of reuse will be determined based on site specific conditions. Reuse will be in accordance with local zoning and land use plans. No specific enhanced buyout areas have been identified, but buyouts are being analyzed in the event that buyout areas are determined at a later date. This action is of fundamental importance in assisting landowners with damaged property. These are the activities that are the subject of this document, and have been combined together for purposes of an aggregated review in accordance with 24 CFR Part 55.24.

All Applicants for financial assistance will be evaluated for eligibility, in accordance with HUD guidelines. The Program will follow federal policies which ensure that no person may be excluded, denied benefits, or subjected to discrimination on the basis race, color, national origin, religion, sex, familial status, and/or physical or mental handicap under any program funded in whole or in part by federal CDBG-DR funds.
CDBG-DR funds from the HUD disaster appropriation may be used for eligible CDBG-DR activities that meet the state CDBG program regulations. However, any appropriation covered by this Action Plan (Public Law 113-2) shall be reviewed for compliance with duplication of benefits guidelines under 42 U.S.C. 5155, which specifically prohibit the use of funds for activities reimbursable by, or for which funds have been made available by FEMA, the Small Business Administration (SBA), or other federal or state sources. Funds may also be used as a matching requirement, share, or contribution for any other federal program, provided all activities are CDBG-DR eligible and in compliance with duplication of benefit guidelines.

**Executive Order 11988 & 24 CFR Part 55**

HUD regulation 24 CFR Part 55 implements Executive Order 11988: Floodplain Management. The order requires federal agencies (or a state agency implementing a federal funding program) to reduce the loss of life and property caused by floods; minimize impacts of floods on human safety, health, and welfare; and preserve the natural and beneficial functions of floodplains. Under this order, federal agencies should first look at avoiding all actions in or adversely affecting floodplains unless no practicable alternatives exist. If no practicable alternatives exist, then federal agencies must evaluate the potential effects of the proposed action. In addition, federal agencies are required to demonstrate that all practicable alternatives have resulted in the reduction or elimination of the long- and short-term adverse impacts associated with occupancy and modifications of the floodplain.

Projects located within a floodplain (also known as the SFHA) are subject to Executive Order 11988. Information on where SFHAs are located is available on Flood Insurance Rate Maps (FIRMs) published by FEMA. FEMA uses engineering studies to determine the delineation of these areas or zones subject to flooding. The relevant data source for the SFHA is the latest issued FEMA data or guidance, which includes advisory data (such as Advisory Base Flood Elevations, or ABFE) or preliminary and final FIRMs.

The SFHA is the area that would be inundated by a 100-year flood: an area that has a one percent or greater chance of experiencing a flood in any single year. SFHAs are shown on FIRMs as shaded areas labeled with the letter “A” or “V”.

- “V” zones are coastal flood hazard zones subject to wave run-up in addition to storm surge.
- “A” zones include all other special flood hazard areas.
- “VE” zones, “AE” zones, “V” zones, or “A” zones followed by a number are areas with specific flood elevations, known as Base Flood Elevations (BFE).
- A zone with the letter “A” or “V” by itself is an appropriately studied flood hazard area without a specific flood elevation.
- Within an “AE” zone or a numbered “A” zone, there may be an area known as the “regulatory floodway,” which is the channel of a river and adjacent land areas which must be reserved to discharge a 100-year flood without causing a rise in flood elevations.

The floodplain (FEMA Zones “A”, “AE”, “AH”, “V”, & “VE”) covers large areas of Putnam County. An approximate total of 13,800 acres of floodplain, including surface waters, is mapped within the county boundary and an approximate total of 2,900 acres of floodplain, excluding surface waters, is mapped within the county (source: Base GIS review of FEMA BFE data).
**24 CFR Part 55.1 (c)**

Under 24 CFR Part 55.1 (c), except with respect to actions listed in Part 55.12(c), no HUD financial assistance (including mortgage insurance) may be approved after May 23, 1994 with respect to:

1. Any action, other than a functionally dependent use, located in a floodway;
2. Any critical action located in a coastal high hazard area (“V” zone) (a “critical action” is an action such as storage of volatile materials, irreplaceable record storage, or construction of a hospital or nursing home); or
3. Any non-critical action located in a coastal high hazard area, unless the action is designed for location in a coastal high hazard area or is a functionally dependent use and complies with the construction standards outlined in HUD Regulations 24 CFR Part 55 (c)(3).

**24 CFR Parts 55.11 & 55.20**

Under 24 CFR Parts 55.11 (including Table 1) and 55.20, non-critical actions are allowed in “A” or “V” zones only if the actions are reviewed in accordance with the Floodplain Management 8-step Decision Making Process (8-step process) outlined in 24 CFR Part 55.20. The 8-step process was conducted for the Action Plan Activities within Putnam County, and is detailed below.

**HCR Approach**

In applying Executive Order 11988 and 24 CFR Part 55, HCR's approach is to avoid, to the extent possible, the long- and short-term adverse impacts associated with the occupancy and modification of floodplains as a result of the proposed actions. All Action Plan Activity properties have been reviewed to determine their location in regard to the floodplain and are not located within the floodway. This document potentially applies to all properties within the boundaries of Putnam County. No funding will be committed to properties located in a floodway and no critical actions will receive funding.

**24 CFR Part 55.20 8-Step Process**

**Step ONE: Determine if a Proposed Action is in the 100-Year Floodplain**

At this time, not all of the exact locations of the program properties that will participate are specified. There are approximately 13,800 acres of floodplains within the Action Plan Activity area.

The Action Plan was created in response to severe coastal flooding and storm damage caused by Hurricane Sandy, Hurricane Irene, and Tropical Storm Lee. The Action Plan Activities will address the State’s need for safe, adequate, and affordable housing to the affected population within the legal framework of the program.

Funding will be provided in accordance with the Action Plan for homeowners who meet the program requirements within the Action Plan Activity area of Putnam County. The Action Plan will fund activities necessary for purchase, demolition, and other mitigation activities within the disturbed area of the previously developed parcel.
Step TWO: Initiate Public Notice for Early Review of Proposed Action

Because the Action Plan Activities are located in the floodplain, HCR must publish an early notice that allows the public input into the decision to provide funding for the Action Plan Activities in this area. Once the early public notice and comment period is complete, HCR will assess, consider, and respond to the comments received individually and collectively for the project file, then proceed to Step Three.

A 15-day "Notice for Early Public Review of a Proposed Activity in a 100-Year Floodplain" was published in The Daily News on September 13, 2013. The 15-day period expired on September 30, 2013. The notice targeted local residents, including those in the floodplain. The notice was also sent to the following state and federal agencies on September 13, 2013: Federal Emergency Management Agency (FEMA); U.S Fish and Wildlife Service (USFWS); U.S. Environmental Protection Agency (EPA); U.S. Army Corps of Engineers (USACE); National Park Service (NPS); National Oceanic and Atmospheric Administration (NOAA); NOAA Fisheries Service; New York Department Environmental Conservation; New York State Office of Parks, Recreation and Historic Preservation; New York Department of Transportation; and the New York State Office of Emergency Management. The notice was also sent to Putnam County and the towns and villages within Putnam County. (See EXHIBIT 1 for the notice and proof of publication.)

HCR received one (1) public comment on this notice. The comment was related to buyout locations. See EXHIBIT 3 for the list of comments received by HCR and HCR's response to those comments.

Step THREE: Identify and Evaluate Practicable Alternatives

There are four practicable alternatives. They are: 1) Buyouts; 2) Acquisitions; 3) Grants for reconstruction; and 4) No Action. These alternatives will be discussed in turn.

1) Buyouts- Purchase and demolish damaged properties to allow the floodplain to restore to its natural state: This process will use grant funds to purchase properties from willing sellers affected by Hurricane Sandy, Hurricane Irene, and Tropical Storm Lee. Once purchased, improvements on the property, such as single and multi-family homes, will be removed. The vacant land will then revert to its natural state.

2) Acquisition- Purchase damaged properties for the purpose of rehabilitation, reconstruction, and/or future redevelopment: This process will use grant funds to acquire parcels from willing sellers affected by Hurricane Sandy, Hurricane Irene, and Tropical Storm Lee. The specific details of reuse of acquired properties are unknown at this time, and will be determined on a site specific basis. Depending on the condition of the parcel, homes on the property may either be reconstructed or demolished and assessed for future redevelopment in a manner consistent with local comprehensive plans and zoning regulations.
3) Reconstruction Grants- Issue grant awards to assist homeowners with elevation and reconstruction of damaged properties: This alternative would identify all homes within the floodplain that were substantially damaged by Hurricane Sandy, Hurricane Irene, and Tropical Storm Lee. Each property owner would then be provided funds to repair the damage to their property. This program would require that any grant recipients elevate their property to updated elevation standards.

4) No Action- This alternative would offer no assistance to homeowners in the affected area. As such, home owners would be allowed to rebuild according to modern standards, demolish damaged properties, or leave their homes in their present condition. Many homeowners would be unable to recover from the devastation of Hurricane Sandy, Hurricane Irene, and Tropical Storm Lee. Further reconstruction would be parcel by parcel and result in wide variation in the safety and building standards of the affected parcels.

These alternatives have been evaluated in response to public comments received.

**Step FOUR: Identify Potential Impacts of the Proposed Actions**

The potential impacts of the Proposed Actions on the floodplain are described below.

The Proposed Action is to either purchase the property for restoration of the floodplain (Buyout) or to purchase the property for clean-up and repair and/or future development (Acquisition). Under a Buyout, the State will purchase flood affected property in a floodplain, demolish on-site structures, and return the property to open space. This program is voluntary. The State will not require any owner to sell property to the State as part of this program or any presently planned future program. The State will not use its power of eminent domain (sometimes called “condemnation”) to obtain land for this program. It is the policy of the State to encourage owners of parcels in specific, identified flood-prone areas to vacate their property and offer it to the State for purchase. This policy is intended to help people relocate away from areas that were most damaged by the flood and reduce the potential for future flood losses. Once the property is purchased, any structures that remain on-site will be demolished and the area will be returned as close as practical to natural conditions and allowed to remain open space in perpetuity. This will allow the land to naturally provide a buffer and to mitigate future flooding.

Under an Acquisition, flood affected properties will also be purchased by the State. The specific details of reuse of acquired properties are unknown at this time, and will be determined on a site specific basis. These homes will be assessed and may be reconstructed. Severely damaged homes may be demolished, and the land cleared of debris. Any redevelopment of the property will occur in accordance with local land use plans and regulations. Acquisition is of fundamental importance in assisting landowners with damaged property located further inland than the areas targeted for Buyouts. A traditional buyout of property further inland would invariably result in undeveloped parcels scattered throughout otherwise developed areas. By creating an Acquisition purchase option that allows for reconstruction, the State will be able to provide financial assistance to homeowners affected by Hurricane Sandy, Hurricane Irene, and Tropical Storm Lee, reconstruct damage properties or demolish severely damaged housing and replace it with safe modern construction and promote community revitalization.
Step FIVE: Minimize Threats to Life and Property and to Natural and Beneficial Floodplain Values. Restore and Preserve Natural and Beneficial Floodplain Values.

Regarding the Buyout portion of the Action Plan Activities, restoring the Putnam County shoreline to its natural state will minimize threats to life and property, as well as restore and preserve natural and beneficial floodplain values. By preventing construction and reconstruction of homes in this area, this program will reduce the population within the floodplain, exposing fewer people to the effects of natural disasters. Further, since the land will be free of costly improvements, future storm damage will be minimized. By removing manmade buildings and infrastructure in this area, the floodplain will be returned to its natural state. As such, this program will not merely limit damage to the floodplain, but actually restore and improve upon the natural and beneficial floodplain values.

Acquisition of damaged properties will similarly protect life, property, and the natural and beneficial floodplain values. Rehabilitation, reconstruction or removal will improve health and safety by limiting public exposure to dangerous and dilapidated structures. It will also remove improvements that are not presently constructed to the highest elevation, preventing excessive future damage to these parcels. All repairs and reconstruction will be conducted in accordance with local land use plans and will be built using current construction standards to improve resistance to future flood damage.

Step SIX: Re-evaluate Alternatives

There are four practicable alternatives on a programmatic level. They are: 1) Buyouts; 2) Acquisitions; 3) Reconstruction Grants; and 4) No Action. These alternatives will be discussed in turn.

Buyouts- The first alternative is to purchase properties for the purpose of restoring the floodplain to its natural state and is the most prudent course of action. By restoring the floodplain to its natural state, this alternative both mitigates the potential for future damage from flooding and promotes public safety by removing dwellings from the path of natural disasters. Further, it enhances the environment by restoring the seaside area to its natural floodplain condition.

Acquisitions- The second alternative is to acquire damaged properties for the purpose of rehabilitation or future redevelopment. This policy has many of the same benefits as a traditional buyout, but allows more flexibility in maintaining consistent land use in developed areas. The specific details of reuse will be determined based on site specific conditions. Reuse will be in accordance with local zoning and land use plans.

Reconstruction Grants- The third alternative is to issue grant awards for reconstruction of damaged properties. The awards would be used to raise the elevation of and assist with the rehabilitation or reconstruction of damaged homes. Rebuilding damaged properties may be appropriate in some circumstances; however reconstruction on its own is insufficient to meet the other community needs. In particular it would inadequately address the need to reclaim the natural floodplain area, to assist homeowners whose property is too severely damaged to rebuild, or to assist homeowners who do not seek to rebuild within a floodplain. Due to the substantial differences between buyouts and acquisitions and rehabilitation, a separate floodplain management document has been issued for rehabilitation projects.
No Action- This alternative would mean that Applicants would not receive grant awards under the Recovery Program. As a result, these homeowners may not be able to recover. This alternative would likely encourage the abandonment of severely damaged property as the cost to rebuild to current standards may be prohibitive to many. Further, properties that have not been substantially damaged may remain but in an unimproved state. Since Applicants would not be provided financial assistance to elevate their homes their properties would be more vulnerable to future flooding conditions. The No Action alternative would neither address the need for safe, decent, and affordable housing, nor require homes within the floodplain to be elevated to the highest standard for flood protection.

These alternatives have been reevaluated in response to public comments received.

Step SEVEN: Issue Findings and a Public Explanation

It is our determination that the preferred alternatives are a combination of traditional buyouts that purchase damaged homes for the creation of open space and acquisitions that purchase damaged parcels but allow for rehabilitation or future redevelopment. These actions are in accordance with the proposed Action Plan. The benefits of these alternatives are: 1) restoring the area to its natural condition to maintain the value of our floodplains; 2) limiting excessive spending to rebuild properties in flood prone areas; 3) preventing future high-value damage to land improvements by preventing the construction of such improvements in flood prone areas; 4) minimizing detrimental impacts on human health; 5) promoting the redevelopment of damaged inland parcels consistent with current land use; and 6) removing damaged improvements to allow for future construction that meets with modern elevation and construction standards for inland parcels.

In accordance with 24 CFR 55, a 7-day "Notice for Final Public Review of a Proposed Activity in a 100-Year Floodplain" was published in The Daily News on October 3, 2013. The 7-day period expired on October 10, 2013. The notice targeted local residents, including those in the floodplain. The notice was also sent to the following state and federal agencies on September 17, 2013: Federal Emergency Management Agency (FEMA); U.S Fish and Wildlife Service (USFWS); U.S. Environmental Protection Agency (EPA); U.S. Army Corps of Engineers (USACE); National Park Service (NPS); National Oceanic and Atmospheric Administration (NOAA); NOAA Fisheries Service; New York Department Environmental Conservation; New York State Office of Parks, Recreation and Historic Preservation; New York Department of Transportation; and the New York State Office of Emergency Management. The notice was also sent to Putnam County and the towns and villages within Putnam County. (See EXHIBIT 2 for the notice and proof of publication.) The notice describes the reasons why the project must be located in the floodplain, a list of alternatives considered, and all mitigation measures to be taken to minimize adverse impacts and preserve natural and beneficial floodplain values. All comments received have been considered.

HCR received zero (0) public comment on this notice. See EXHIBIT 3 for the list of comments received by HCR and HCR's response to those comments.
Step EIGHT: Implement the Action

Step eight is implementation of the proposed action. HCR will ensure that all mitigation measures prescribed in the steps above will be adhered to. Also, prior to any buyouts or acquisitions, HCR will conduct a National Environmental Policy Act (NEPA) review in accordance with 24 CFR Part 58 and a New York State Environmental Quality Review Act (SEQR) review in accordance with 6 NYCRR Part 617.

EXHIBIT 1 Copy of Notice Transmitting Notice of Early Public Review and Proof of Publication

EXHIBIT 2 Copy of Notice Transmitting Notice of Final Public Review and Proof of Publication

EXHIBIT 3 Public Comments Received and HCR Response
September 13, 2013:

To: All Interested Agencies, Groups, & Individuals

This is to give notice that New York State Homes and Community Renewal (HCR) has conducted an evaluation as required by Executive Order 11988 in accordance with HUD regulations under 24 CFR 55.20 Subpart C - Procedures for Making Determinations on Floodplain Management to determine the potential effect that its activity in the floodplain will have on the human environment for Community Development Block Grant – Disaster Recovery (CDBG-DR) Recreate NY Home Buyout Program under Title I of the Housing and Community Development Act of 1974 (PL 93-383).

The State has currently been allocated $1.7 billion of CDBG-DR funds for acquisition, demolition, reconstruction, improvement, financing, and use of existing properties in the most impacted municipalities and counties. This funding reflects activity under the first allocation of funds. A significant portion of the current allocation will be used for the buyout and acquisition of some of the worst damaged properties, including those that are the subject of this Notice. This Notice pertains to properties opting into the buyout and acquisition plan in Putnam County, New York.

There are approximately 13,800 acres of floodplain in Putnam County. The floodplains in the state are depicted on the FEMA Base Flood Elevation Map, which can be viewed at www.msc.fema.gov.

Under buyouts, flood affected properties will be purchased by the State. Structures on the properties will be removed so that the land reverts to its natural state. This project aims to preserve our natural floodplains, prevent future damage to homes and businesses, promote uniform land usage, and assist those impacted by Hurricane Sandy, Hurricane Irene, and Tropical Storm Lee.

Under acquisitions, flood affected properties will be purchased by the State. Specific details of reuse of the acquired properties are unknown at this time; however, use will be in accordance with local zoning and land use plans.

No specific enhanced buyout areas have been identified, but buyouts are being analyzed in the event that buyout areas are determined at a later date. This action is of fundamental importance in assisting landowners with damaged property located further inland.

There are three primary purposes for this notice. First, people who may be affected by activities in floodplains and those who have an interest in the protection of the natural environment have an opportunity to express their concerns and provide information about these areas. Second, adequate public notice is an important public education tool. The dissemination of information about floodplains facilitates and enhances federal efforts to reduce the risks associated with the occupancy and modification of these special areas. Third, as a matter of fairness, when the federal government determines it will participate in actions taking place in floodplains, it must inform those who may be put at greater or continued risk.
Written comments should be submitted via email and further information can be requested at NYSCDBG_DR_ER@nyshcr.org. Please include “Putnam County Floodplain Work Comments” in the subject line. Written comments may also be received by HCR at the following address: Attention: Heather Spitzberg, Certifying Officer, NYS Homes and Community Renewal, 38-40 State Street, Hampton Plaza, Albany, NY 12207. Comments may be received by telephone at (518) 486-3379. All comments must be received or postmarked on or before Monday, September 30, 2013. A full copy of the Floodplain Management Document, including area maps, can be viewed from Monday – Friday, 9:00 AM - 5:00 PM at NYS Homes and Community Renewal, 38-40 State Street, Hampton Plaza, Albany, NY 12207 or at http://www.nyshcr.org/Programs/NYS-HCR-CDBG-DR/EnvironmentalReview.

Legal Notices

September 13, 2013:

To: All Interested Awardees, Grantees, and Individuals

The New York State Homes and Community Renewal (HCRI) has conducted an evaluation as required by Executive Order 1988 in accordance with HUD regulations under 24 CFR 35, Subpart C, Procedures for Making Determinations on Floodplain Management to determine the extent to which HCRI is in compliance with the terms of the contract award. This evaluation was conducted under HUD regulations under Section 109 of the Innovative Community Development Block Grant Program (PL 93-383) and in accordance with Executive Order 11988. The evaluation was conducted by Certified Officer, NYS Homes and Community Renewal, 6190 Wolf Road, Albany, NY 12207.

The purpose of the evaluation is to give notice that New York State Homes and Community Renewal has conducted an evaluation as required by Executive Order 1988. In accordance with HUD regulations under 24 CFR 35, Subpart C, Procedures for Making Determinations on Floodplain Management to determine the extent to which HCRI is in compliance with the terms of the contract award. This evaluation was conducted under HUD regulations under Section 109 of the Innovative Community Development Block Grant Program (PL 93-383). This evaluation was conducted by Certified Officer, NYS Homes and Community Renewal, 6190 Wolf Road, Albany, NY 12207.

This notice is an important public education tool. The dissemination of information about Federal floodplain and environmental planning efforts to reduce the risks associated with the occurrence and modification of those floodplains is essential to the health and safety of the American people. Federal floodplain and environmental planning efforts are essential to the health and safety of the American people.

There are some clear strategies for this notice. First, people who may be affected by the notification should be informed about the potential for the occurrence of flooding and other environmental events and should consult with officials to take appropriate action. Second, officials should be informed about the potential for the occurrence of flooding and other environmental events and should consult with officials to take appropriate action. Third, officials should be informed about the potential for the occurrence of flooding and other environmental events and should consult with officials to take appropriate action.

Written comments should be submitted via email and further information regarding the rules and procedures of the FEWAES may be obtained at http://www.nyshc.org/Programs/NYS-HCR-CDBG-DR/.

FINAL NOTICE AND PUBLIC REVIEW OF A PROPOSED ACTIVITY IN A 100-YEAR FLOODPLAIN

October 3, 2013:

To: All Interested Agencies, Groups, & Individuals

This is to give notice that New York State Homes and Community Renewal (HCR) has conducted an evaluation as required by Executive Order 11988 in accordance with HUD regulations under 24 CFR 55.20 Subpart C - Procedures for Making Determinations on Floodplain Management to determine the potential effect that its activity in the floodplain will have on the human environment for Community Development Block Grant – Disaster Recovery (CDBG-DR) Recreate NY Home Buyout Program under Title I of the Housing and Community Development Act of 1974 (PL 93-383).

The State has currently been allocated $1.7 billion of CDBG-DR funds for acquisition, demolition, reconstruction, improvement, financing, and use of existing properties in the most impacted municipalities and counties. This funding reflects activity under the first allocation of funds. A significant portion of the current allocation will be used for the buyout and acquisition of some of the worst damaged properties, including those that are this subject of this Notice. This Notice pertains to properties opting into the buyout and acquisition plan in Ulster County, New York.

There are approximately 35,200 acres of floodplain in Ulster County. The floodplains in the state are depicted on the FEMA Base Flood Elevation Map, which can be viewed at www.msc.fema.gov.

Under buyouts, flood affected properties will be purchased by the State. Structures on the properties will be removed so that the land reverts to its natural state. This project aims to preserve our natural floodplains, prevent future damage to homes and businesses, promote uniform land usage, and assist those impacted by Hurricane Sandy, Hurricane Irene, and Tropical Storm Lee.

Under acquisitions, flood affected properties will be purchased by the State. Specific details of reuse of the acquired properties are unknown at this time, however use will be in accordance with local zoning and land use plans.

No specific enhanced buyout areas have been identified, but buyouts are being analyzed in the event that buyout areas are determined at a later date. This action is of fundamental importance in assisting landowners with damaged property located further inland.

There are three primary purposes for this notice. First, people who may be affected by activities in floodplains and those who have an interest in the protection of the natural environment have an opportunity to express their concerns and provide information about these areas. Second, adequate public notice is an important public education tool. The dissemination of information about floodplains facilitates and enhances federal efforts to reduce the risks associated with the occupancy and modification of these special areas. Third, as a matter of fairness, when the federal government determines it will participate in actions taking place in floodplains, it must inform those who may be put at greater or continued risk.
Written comments should be submitted via email and further information can be requested at NYSCDBG_DR_ER@nyshcr.org. Please include “Ulster County Floodplain Work Comments” in the subject line. Written comments may also be received by HCR at the following address: Attention: Amy Zamenick, Certifying Officer, NYS Homes and Community Renewal, 38-40 State Street, Hampton Plaza, Albany, NY 12207. Comments may be received by telephone at (518) 473-4732. All comments must be received or postmarked on or before Thursday, October 10, 2013. A full copy of the Floodplain Management Document, including area maps, can be viewed from Monday – Friday, 9:00 AM - 5:00 PM at NYS Homes and Community Renewal, 38-40 State Street, Hampton Plaza, Albany, NY 12207 or at http://www.nyshcr.org/Programs/NYS-HCR-CDBG-DR/EnvironmentalReview. To inquire about how to apply for benefits under this and other New York State Disaster Relief programs, please call the Recovery Hotline at 1-855-NYS-SANDY, Monday-Friday 8am-8pm. Or, go to www.nysandyhelp.ny.gov.

FINAL NOTICE AND PUBLIC REVIEW OF A PROPOSED ACTIVITY IN A 100-YEAR FLOODPLAIN

October 3, 2013

To: All Interested Parties, Groups, & Individuals

This is to give notice that New York State Homes and Community Renew (NYSHCR) has conducted an evaluation as required by Executive Order 1998 in accordance with 26 CFR, Part 55.35, Subpart C, Procedures for Making Determinations on Floodplain Management to determine the potential effect that its activity in the floodplain will have on the human environment for Community Development Block Grant - Disaster Recovery (CDBG-DR) Projects. NY Home Buoyant Program under Title I of the Housing and Community Development Act of 1974 (PL 93-383).

The State has currently been allocated $1.7 billion of CDBG-DR funds for acquisition, demolition, reconstruction, improvement, purchase, and use of existing properties in the most impacted municipalities and counties. This funding reflects activity under the first allocation of funds. A significant portion of the current allocation will be used for the buyout and acquisition of some of the worst damaged properties, including those that are subject of this Notice. This Notice pertains to properties falling into the buyout and acquisition plan in Pulaski County, New York.

There are approximately 12,000 acres of floodplain in Pulaski County. The floodplains in the area are depicted on the FEMA Base Flood Elevation Map, which can be viewed at www.fema.gov.

Under buyouts, flood affected properties will be purchased by the State. Structures on the properties will be removed so that the land reverts to its natural state. This project aims to preserve our natural floodplains, prevent future damage to homes and businesses, eliminate uniform land usage, and assist those impacted by Hurricane Sandy, Hurricane Irene, and Tropical Storm Lee.

Under acquisitions, flood affected properties will be purchased by the State. Specific details of reuse of the acquired properties are unknown at this time, however use will be in accordance with local zoning and local use plans.

No specific enhanced buyout areas have been identified, but buyouts are being prioritized in the event that buyout areas are determined at a later date. This action is in furtherance of insurance in assuring landowners with damaged property located further inland.

There are three primary purposes for this notice. First, people who may be affected by activities in floodplains and those who have an interest in the natural environment have an opportunity to express their concerns and provide information about these areas. Second, this notice is an important public education tool. The dissemination of information about floodplains facilitates and enhances public efforts to reduce the risk associated with the occurrence and modification of these special areas. Third, as a matter of fairness, when the federal government determines it will participate in actions taking place in floodplains, it must inform those who may be at greater or continued risk.

Written comments should be submitted via email and further information can be received at NYSHCR at NYSHCR.org or by calling the Floodplain Management Division at 318-0400. Written comments may also be received on NYSHCR's website or via the following address: Attention: Amy Zamecnik, Certifying Officer, 36-05 State Street, Holyoke 4 Plaza, Holyoke, MA 01040. Comments may also be received by email at amy.zamecnik@nyshcr.org. Please e-mail us your comments within 30 days of this notice.
