Certification of Extraordinary Site Conditions

Below is a list of items that may qualify as extraordinary site conditions. The program included \$25,000 for Homeowners who were required to demolish and reconstruct their homes (check all that apply):

- Building site is sloped more than a 7.0% grade*
- Soil conditions require non-typical foundation systems (helical piles, timber piles, grade beams and pile caps), a typical foundation would be a footing with a stem wall that is less than 32 inches wide or 48 inches tall*
- Site requires preparation such as excavation and trenching that exceeds 20 cubic yards of material*
- Access to the building site is restricted due to no direct street access, no vehicles allowed, bridges, narrow roads, low overhead wires, trees, local building codes, and/or other circumstances where standard building practices are not possible*
- Protection of adjacent elements with barriers, scaffolding, temporary walls.*
- Unusually long and/or difficult utility connections exceeding 100 feet and including new connection to city sewer systems*
- Fire sprinklers as required by local codes*

Total additional costs caused by above condition(s): _____

(If the additional costs are less than \$25,000 then the difference will be deducted from the final payment)

I hereby certify that the Extraordinary Site Conditions indicated above were present at the referenced project as defined by the NY Rising Housing Recovery Program.
