

PUBLIC MEETING NOTICE

Living Breakwaters and Tottenville Dune Projects

The Governor's Office of Storm Recovery invites the public to attend a Public Scoping Meeting on coastal and social resiliency measures to be funded by federal Community Development Block Grant Disaster Recovery (CDBG-DR) funds in and adjacent to Tottenville, on Staten Island's South Shore ("Proposed Actions").

**Thursday, April 30
7:00 to 9:00 pm**

**CYO-MIV
Community Center
6541 Hylan Blvd**

Your participation and feedback will inform the State of New York of your concerns and the public is encouraged to attend!

Tottenville, Staten Island (for illustrative purposes only)

The environmental review will evaluate the impacts of collectively implementing both components to achieve layered shoreline protection and social resiliency, and also include comparative analysis of the impacts of individually implementing the components.

- 1 13,000 linear-foot ecologically enhanced offshore breakwater system that would reduce wave energy at the shoreline and prevent shoreline erosion, and an associated proposed community Water Hub (1a), which would provide a place for educational programs associated with the breakwater
- 2 A proposed hardened dune system would be located along the Tottenville shoreline from approximately Brighton Street to Joline Avenue
